

2021 SIDEWALK REPAIR PROJECT, C3024.6

The City of El Cerrito's Public Works Department has contracted J.J. R. Construction to construct the 2021 Sidewalk Repair Project on the last week of January of 2022.

This project will rehabilitate the sidewalks including curb, gutter, and drainage piping that have been damaged by the roots of street trees at six (6) sites along San Pablo Avenue. The work will be in front of the following addresses: 11550 San Pablo Avenue, 10767 San Pablo Avenue, 10794 San Pablo Avenue, 10468 San Pablo Avenue, 10360 San Pablo Avenue, and 10344 San Pablo Avenue. These locations were prioritized for permanent repair based on several factors including severity of the sidewalk damage, location on a street identified as a high-volume pedestrian route, proximity to schools and other public facilities, and type of repair. [\(Please see also the map included below\):](#)

Traffic Impacts While construction is underway, some street parking within the work area will be affected at some time during the project. Signs for “NO PARKING” will be posted 72 hours in advance of the work to indicate the exact day and period of time in each area that you should not park. Please pay attention to these signs, and any pedestrian redirection signs that will be placed around the sidewalks temporarily blocked during the work. Vehicles that do not follow the “NO PARKING” signs will be towed away at the owner’s expense if they are not moved prior to the posted times.

Work Hours: In general, [Work hours are from 8:00 am to 5:00 pm but](#) lane closures or complete road closures will take place from 8:30 a.m. to 4:30 p.m. with modified hours to accommodate pick-up and drop-off times near schools. Emergency vehicles will always be

allowed to proceed through the work site. All lanes of traffic will be restored no later than 5 p.m. each day.

If you have any questions regarding this construction, please call Sam or Carlos at (650) 343-6109 (J.J.R. Construction). For general questions about the project or other assistance, please contact the City's Consultant Resident Engineer, Chris Avila, at (925) 890- 6525; or the City's Engineering Manager, Ana Bernardes at (510) 215-4385 or at abernardes@ci.el-cerrito.ca.us; or call the **or call the Public Works Department at (510) 215-4382.**
