AGENDA

ADJOURNED REGULAR CITY COUNCIL MEETING
Tuesday, March 5, 2019 – 5:30 p.m.
City Council Chambers

REGULAR CITY COUNCIL MEETING
Tuesday, March 5, 2019 – 7:00 p.m.
City Council Chambers

Meeting Location
El Cerrito City Hall
10890 San Pablo Avenue, El Cerrito

Rochelle Pardue-Okimoto – Mayor

Mayor Pro Tem Greg Lyman
Councilmember Janet Abelson
Councilmember Paul Fadelli
Councilmember Gabriel Quinto

5:30 PM ROLL CALL - CONVENE ADJOURNED REGULAR CITY COUNCIL MEETING

1. POLICY MATTERS
One Hour and 40 minutes of public comment was heard at the February 19th meeting; therefore, public comments will be limited to 2 minutes per person and a total of 20 minutes. If you have previously spoken on this item, you are encouraged to leave this allotment of time for new speakers on the topic. All persons wishing to speak should submit a speaker card to the City Clerk and will be called in the order received until the time limit has been reached.

A. Adjourned from February 19, 2019 regular meeting Tenant Protections Study Session: El Cerrito 2017 Affordable Housing Strategy, Pillar B: Reduce the Risk of Displacement and Help Stabilize At-Risk Populations

Action Proposed: Continued Council discussion regarding tenant protection tools, discuss policy and program options and provide staff direction towards development of integrated package of tenant protection ordinances.
Contact: Aissia Ashoori, Management Analyst II, Community Development Department; Melanie Mintz, Community Development Director, Community Development Department

2. ADJOURN ADJOURNED REGULAR CITY COUNCIL MEETING
ROLL CALL - CONVENE REGULAR CITY COUNCIL MEETING

1. PLEDGE OF ALLEGIANCE TO THE FLAG OR OBSERVATION OF MOMENT OF SILENCE – Mayor Pardue-Okimoto

2. COUNCIL/STAFF COMMUNICATIONS
Reports of closed session, commission appointments and informational reports on matters of general interest which are announced by the City Council and staff.

3. ORAL COMMUNICATIONS FROM THE PUBLIC
All persons wishing to speak should sign up with the City Clerk. Remarks are typically limited to 3 minutes per person. The Mayor may reduce the time limit per speaker depending upon the number of speakers. Kindly state your name and city of residence for the record. Comments regarding non-agenda, presentation and consent calendar items will be heard first. Comments related to items appearing on the Public Hearing or Policy Matter portions of the Agenda are taken up at the time the City Council deliberates each action item. Individuals wishing to comment on any closed session scheduled after the regular meeting may do so during this public comment period or after formal announcement of the closed session.

4. ADOPTION OF THE CONSENT CALENDAR
All items on the consent calendar shall be acted upon in one motion, unless a member of the City Council or staff request separate consideration.

A. Proclamation – Women’s History Month and International Women’s Day

Action Proposed: Pass a motion to approve a proclamation designating the month of March as “Women’s History Month” and March 8, 2019 as “International Women’s Day”.
Contact: Kristen Cunningham, Human Resources Manager, City Management

B. Approval of Minutes

Action Proposed: Pass a motion to approve the minutes for the meeting of January 15, 2019.
Contact: Holly M. Charléty, City Clerk, City Management

C. Recognize March 10, 2019 as the 60th anniversary of the Tibetan national uprising, and affirm support to the people of Tibet

Action Proposed: Pass a motion to adopt a resolution declaring 1) March 10, 2019, the 60th anniversary of the Tibetan national uprising, as “Tibet Day” in the City of El Cerrito and display the Tibetan flag at City Hall; and 2) Declaring El Cerrito's expression of solidarity with the Tibetan people and their just, peaceful, and non-violent movement to remind the world of the ongoing suppression of human rights and freedom in Tibet and the continuous degradation of culture, religion, land, and identity of the Tibetan people by China.
5. PRESENTATIONS

A. Environmental Quality Committee Workplan

**Action Proposed:** Receive and discuss the Environmental Quality Committee’s presentation regarding the Committee’s accomplishments, activities, goals and workplan. The City Council may provide feedback as desired.

**Contact:** Will Provost, Management Analyst II and Staff Liaison, Public Works Department

6. PUBLIC HEARINGS – None

7. POLICY MATTERS – None

8. CITY COUNCIL LOCAL & REGIONAL LIAISON ASSIGNMENTS

Mayor and City Council communications regarding local and regional liaison assignments and committee reports.

9. ADJOURN REGULAR CITY COUNCIL MEETING

The next regularly scheduled City Council meeting is Tuesday, March 19, 2019 at 7:00 p.m. in the City Council Chambers, 10890 San Pablo Avenue, El Cerrito.

*The City of El Cerrito serves, leads and supports our diverse community by providing exemplary and innovative services, public places and infrastructure, ensuring public safety and creating an economically and environmentally sustainable future.*

---

- Council Meetings can be heard live on FM Radio, KECG – 88.1 and 97.7 FM and viewed live on Cable TV - KCRT- Channel 28 and AT&T Uverse Channel 99. The meetings are rebroadcast on Channel 28 the following Thursday and Monday at 12 noon, except on holidays. Live and On-Demand Webcast of the Council Meetings can be accessed from the City's website [http://www.el-cerrito.org/streamingmedia](http://www.el-cerrito.org/streamingmedia) and is streamed with closed caption. Copies of the agenda bills and other written documentation relating to items of business referred to on the agenda are on file and available for public inspection in the Office of the City Clerk, at the El Cerrito Library and posted on the City’s website at [www.el-cerrito.org](http://www.el-cerrito.org) prior to the meeting.

- In compliance with the Americans with Disabilities Act, if you need special assistance to participate in this meeting, please contact the City Clerk, (510) 215-4305. Notification 48 hours prior to the meeting will enable the City to make reasonable arrangements to ensure accessibility to this meeting. (28 CFR 35.102-35.104 ADA Title I).

- **The Deadline for agenda items and communications** is eight days prior to the next meeting by 12 noon, City Clerk’s Office, 10890 San Pablo Avenue, El Cerrito, CA. Tel: 215–4305 Fax: 215–4379, email cityclerk@ci.el-cerrito.ca.us

- *IF YOU CHALLENGE A DECISION OF THE CITY COUNCIL IN COURT, YOU MAY BE LIMITED TO RAISING ONLY THOSE ISSUES YOU OR SOMEONE ELSE RAISED AT THE COUNCIL MEETING. ACTIONS CHALLENGING CITY COUNCIL DECISIONS SHALL BE SUBJECT TO THE TIME LIMITATIONS CONTAINED IN CODE OF CIVIL PROCEDURE SECTION 1094.6.*

- The City Council believes that late night meetings deter public participation, can affect the Council’s decision-making ability, and can be a burden to staff. City Council Meetings shall be adjourned by 10:30 p.m., unless extended to a specific time determined by a majority of the Council.
I’ve sent this to the Council and hope you can put this in the agenda package for this meeting. Thanks, Judith

Mayor Pardue-Okimoto and Council Members:

As you decide how best to provide tenant protections in El Cerrito, I hope you’ll hold firm to the most important fact: The region (including our city) is in a deep housing crisis. In this crisis, tenants and landlords all have needs and responsibilities. It’s your job, as our elected officials, to develop policies and practices that both mitigate the consequences of this crisis for El Cerritans and also make sure these consequences are shared and don’t fall only on the most vulnerable.

Of course, there is a great deal of conversation state-wide about this crisis. As you know, one important regional approach is the Association of Bay Area Governments’ and the Metropolitan Transit Agency’s “grand bargain” — CASA — https://www.spur.org/news/2019-01-31/did-bay-area-reach-grand-bargain-solve-housing. There’s also lots brewing in the Legislature. I went to Saturday February 23rd’s Housing Update with East Bay Electeds at which Senator Skinner and Assembly Members Wicks and Bonta spoke about their legislative priorities for housing in the 2019 session. Below I’ve described and linked to the ideas and specific bills that were discussed.

SB 330 and CASA both declare a crisis and — as in the crisis that followed the North Bay fires of 2017 — make sometimes dramatic proposals that will be in place for a limited amount of time. There is widespread recognition that dealing with this crisis will require many different approaches — from building more housing to removing existing zoning barriers, to making public land available for affordable housing, and more.

CASA and the electeds who spoke on Saturday highlight the need for tenant protections: Just Cause eviction policies, rent caps, anti-gouging policies, and free legal aid for tenants facing evictions.

Given the complexity of the terrain, the density of the staff report at the February 19 City Council meeting, and given that there are regional and state efforts to address the crisis, it seems clear to me that the best approach for El Cerrito aligns with Human Relations Commission resolution:

- Set up some immediate (and temporary-till-we-know-more) anti-gouging and just cause eviction measures
- While at the same time creating a task force — one that would include both tenants and landlords — to talk honestly and come up with proposals.

I know some El Cerrito landlords are afraid. And, as a tenant with an exceptionally fair landlord, I don’t want good landlords punished — either financially through fees or by having to deal with another bureaucracy. So I think both you and the task force I hope you create focus on ways El Cerrito, a small city, can be creative:

- Could a rent registry be established in such a way that landlords who haven’t raised rents above a small percentage in the previous two years pay nothing, those who raised rents at
a larger percentage pay something, and those who raised rents exorbitantly pay a great deal?

- Could El Cerrito expand its inspection program to gather much of the necessary information, thereby doing away with need for an additional rent registry?
- Could a mechanism be established, modeled on existing City code enforcement programs, where tenants could **safely** report bad landlords, and which would have real follow through?

This is neither the time to do nothing or to put too much solid in place before there has been the deep community conversation we need to brainstorm the creative approaches that can work.

Sincerely,

Judith Tannenbaum

El Cerrito, CA 94530

**Notes from February 23rd’s Housing Update with East Bay Electeds**

Event was held at TechEquity and that collaborative’s housing priorities were the same as these electeds':

Here’s summary of the Association of Bay Area Governments and the Metropolitan Transit Agency’s “grand bargain” — CASA — for the region

CASA — Bay Area Regional, but attempt to make statewide through legislature (proposed to be in place for 15 years) [https://www.spur.org/news/2019-01-31/did-bay-area-reach-grand-bargain-solve-housing](https://www.spur.org/news/2019-01-31/did-bay-area-reach-grand-bargain-solve-housing)

Here are some of the bills currently under consideration by the legislature:

**SB 18 Keep California**

(Coauthors: Senators Beall and Wiener) (Coauthors: Assembly Members Bonta and Wicks)

**SB 330 Housing Crisis Act** (would respond to the crisis as a crisis, thereby suspending many rules and regs currently in place for a period of time, as happened after the North Bay Fires) [https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201920200SB330](https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201920200SB330)

**AB 3037 Securing sustainable funding streams for affordable housing development** [https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201720180AB3037](https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201720180AB3037)

Some of the above bills — esp SB 330 — include support for the following, though there will likely be other specific bills on these points:

- Anti-gouging bills
- Collecting data, including statewide rental registry
- Some kind of redevelopment housing bond
Ability to use governmental surplus land
Money for legal aid fund
Ban the box in housing
Money to train people getting out of prison and jail for construction jobs

EL CERRITO CITY COUNCIL PROCLAMATION
Designating the Month of March as “Women’s History Month”
and March 8, 2019 as “International Women’s Day.”

WHEREAS, Women of every race, class, and ethnic background have
made historic contributions to the growth and strength of the United States, the
state of California, and the City of El Cerrito in countless recorded and unrecorded
ways; and

WHEREAS, Women have played and continued to play a critical economic,
cultural, and social role in every sphere of the life of our nation and in the City of
El Cerrito by constituting a significant portion of the labor force working inside and
outside the home; and

WHEREAS, Women have played a unique role throughout our history by
providing the majority of the volunteer labor force; and women were particularly
important in the establishment of early charitable, philanthropic, and cultural
institutions in the United States and throughout the Bay Area; and

WHEREAS, Women have been leaders, not only in securing their own
rights of suffrage and equal opportunity, but also in the abolitionist movement, the
emancipation movement, the industrial labor movement, the civil rights movement,
and the peace movement, to create a more fair and just society for all; and

WHEREAS, locally, women have played a key role in the City of El Cerrito’s
history as leaders in the community, in our schools and universities, and at City
Hall; and the City proudly recognizes the importance of issues affecting women
and girls and supports further sustainable change in their well-being and
advancement; and

WHEREAS, International Women’s Day is celebrated globally on March 8th
and addresses the social, economic, and political barriers still facing women and
girls while celebrating their achievements and the progress that have been made
in support of women’s equality.

NOW THEREFORE, the City Council of the City of El Cerrito does hereby
proclaim March 2019 as Women’s History Month and March 8, 2019 as
International Women’s Day in the City of El Cerrito, and encourages residents to
reflect on, honor, and celebrate the history, courage, commitment,
accomplishments, and contributions of women, not only in El Cerrito but
throughout America.

Dated: March 5, 2019

Rochelle Pardue-Okimoto, Mayor
6:15 p.m.  **ROLL CALL - CONVENE SPECIAL CITY COUNCIL MEETING**  
Mayor Pardue-Okimoto called the meeting to order at 6:17 p.m.  
**Present:** Mayor Pardue-Okimoto; Councilmembers Abelson, Fadelli, Lyman, and Quinto.

1.  **ORAL COMMUNICATIONS FROM THE PUBLIC** – None

2.  **CLOSED SESSION**  
**CONFERENCE WITH LEGAL COUNSEL – ANTICIPATED LITIGATION**  
Initiation of Litigation pursuant to Government Code Section 54956.9(d)(4): One potential case.

3.  **POSSIBLE REPORT OUT OF CLOSED SESSION** – None

4.  **ADJOURN SPECIAL CITY COUNCIL MEETING**  
The meeting was adjourned at 7:06 p.m.

7:00 p.m.  **ROLL CALL - CONVENE REGULAR CITY COUNCIL MEETING**  
Mayor Pardue-Okimoto called the meeting to order at 7:14 p.m.  
**Present:** Mayor Pardue-Okimoto; Councilmembers Abelson, Fadelli, Lyman, and Quinto.

1.  **PLEDGE OF ALLEGIANCE TO THE FLAG OR OBSERVATION OF MOMENT OF SILENCE** – *Councilmember Quinto*

2.  **COUNCIL/STAFF COMMUNICATIONS**

   City Manager Pinkos introduced the new City Clerk, Holly M. Charléty; thanked Interim City Clerk, Sherry Kelly for her service; and shared she would like to bring back the prior City Clerk, Cheryl Morse, to recognize her retirement when she is feeling better.

   Councilmember Fadelli reported attendance at the Chamber of Commerce lunch today, the Trail Trekker meeting last week regarding fire hazards, and East Bay League of Cities meeting. Glad to have minimum wage going into effect in the
City. Mentioned another year without holiday lights in El Cerrito Plaza. For economic development is something to potentially talk about, getting lights in mature trees.

Councilmember Lyman – echoed Councilmember Fadelli’s comments on the chamber lunch. Announced Martin Luther King parade is next Monday, with a viewing of Cracking the Codes on the preceding Sunday. March is renewal time for terms on Boards and Commissions, now is the time to consider serving.

Councilmember Quinto – Met with Sierra Club Executive Board members, the discussion included fire prevention. Last week attended East Bay League of Cities meeting which also included discussion on fire prevention. Is a member of the Environmental Quality Committee for the League of Cities, and supports asking the Governor for more money for Cities for fire prevention. On January 3rd attended ribbon cutting for grand opening of the Richmond Ferry. Attended Contra Costa Mayors Conference, Contra Costa Transit Authority (CCTA) talked about how funding was secured for ferry service in Richmond, and Councilmember Abelson played a huge part. Was nominated as Vice-Chair of the Contra Costa Mayors Conference.

Councilmember Abelson – Added that ferry service was funded primarily by Measure J (1/2 cent sales tax in Contra Costa County), not just the community but the County. Locally was able to select projects that would be included in the measure. Attended installation of John Gioia as the president of the Board of Supervisors for Contra Costa County today.

Mayor Pardue-Okimoto – attended Contra Costa Mayors Conference, first time as a voting member. Congratulated Councilmember Quinto on selection as Vice-Chair of the committee. Reviewed new ferry service fees. At the meeting, the Metropolitan Transportation Commission (MTC) and Association of Bay Area Governments (ABAG) came together for a committee on housing and will share recommendation to solve housing crisis in greater bay area and will provide a presentation at a future conference. Shared Sprinkler Fitters are doing a job search. Today attended Alta Bates subcommittee, City of Berkeley sent letter to Alta Bates requesting specific retrofit costs. Will provide another update after next meeting in March.

3. ORAL COMMUNICATIONS FROM THE PUBLIC

James-Joseph A. Diliberto regarding establishing open air museum on property, requested contact with Ohlone.

Nick Zamorano regarding Eucalyptus Trees, reviewed recent events and concerns about areas within the City.

Paul Duncan regarding fire safety in the Hillside Natural area, establishing evaluation routes, specific action plan, requested Liaison to work with the group.
Marlene George regarding fire safety, attended urban forestry committee meeting, working to collaborate on the City Tree and Shrub ordinance amendments.

Gary Prost regarding what other cities are doing about fire safety.

Susan Duncan regarding Camp fire article and take aways.

Scott Perry regarding need and lack of evacuation routes and need for cooperation with Sunset Cemetery and golf course.

Dave Weinstein regarding updates on Trail Trekker accomplishments and goals.

Sherry Drobner regarding residents working on fire safety, thanked Fire Chief, paramedics, and Council for care when husband had a stroke during December council meeting.

Robin Mitchell regarding Trail Trekkers presentation on fire safety, encourage city to have similar presentations for the public.

4. ADOPTION OF THE CONSENT CALENDAR

**Action:** Passed a motion to approve the consent calendar as indicated below.

**Moved/Seconded:** Councilmembers Lyman/Abelson  
**Ayes:** Mayor Pardue-Okimoto; Councilmembers Abelson, Fadelli, Lyman, and Quinto  
**Noes:** None

**A. Minutes**
Approve the Minutes for the meetings of: 1) November 20, 2018; 2) December 4, 2018; and 3) December 18, 2018.

**Action:** Approved minutes

**B. Transportation Impact Fee Program**
Waive second reading and adopt Ordinance No. 2019-01 adding Chapter 4.54 – Transportation Impact Fee to the Municipal Code.  
*First reading adopted by unanimous vote of the Council on December 18, 2018.*

**Action:** Adopted Ordinance No. 2019-01

**C. Municipal Pooling Authority Board Members**
Adopt a Resolution designating the Human Resources Manager as Primary Board Member and the Assistant City Manager as Alternate Board Member to the Municipal Pooling Authority of Northern California (MPA).

**Action:** Adopted Resolution No. 2019-01

**D. Successor Agency Recognized Obligation Payment Schedule**
Adopt a Redevelopment Successor Agency Resolution reviewing and authorizing submittal of the draft Recognized Obligations Payment Schedule (ROPS) 19-20 (July 1, 2019-June 30, 2020).

**Action:** Adopted Redevelopment Successor Agency Resolution No. 2019-01
7. POLICY MATTERS

A. Tenant Protections Ordinances
At the December 18, 2018 meeting, the Council introduced three ordinances amending the Municipal Code to add: 1) minimum terms for residential leases (“Minimum Lease Terms”); 2) new regulations for the termination of residential tenancies (“Termination of Tenancy”); and 3) a requirement to provide tenant relocation assistance under specified circumstances (“Tenant Relocation”) (together the “Tenant Protection Ordinances”). Prior to introduction, the Council amended the Tenant Relocation Ordinance to modify the circumstances that qualify for tenant relocation assistance to require such assistance for qualifying tenants displaced as a result of a 20% rent increase over a two-year period and to include an additional payment of one month’s rent for special circumstances households. Other non-substantive changes were also made to the Tenant Protection Ordinances prior to introduction. All three ordinances were introduced by unanimous vote of the Council.

Staff recommends that the City Council, by motion:
1. Defer action on the three Tenant Protection Ordinances introduced at the December 18, 2018 City Council meeting.
2. Reaffirm direction given to staff at the December 18, 2018 City Council meeting to prepare a Just Cause for Eviction Ordinance and a Rent Registry Ordinance.
3. Direct staff to return with an integrated package of ordinances, for Council consideration, that includes the Tenant Protection Ordinances, with appropriate amendments, a Just Cause for Eviction Ordinance, and a Rent Registry Ordinance.

Presentation: Sky Woodruff, City Attorney provided an oral report on the item.

Council Discussion: Members of the Council questioned staff on various aspects of the item including intent of action requested tonight; clarification on the 20% increase trigger for relocation assistance; conflicts with Costa-Hawkins; protections of mom and pop landlords; clarification on calculations for relocation costs; and timeline if action is deferred tonight.

Public Comments:

Bill Kuhlman – regarding support of deferring action, helping landlords be successful.

Eric Mayers – regarding support of staff recommendation, in favor or rights for both landlords and tenants.
**Elizabeth Thorsnes** – regarding support of a rent registry.

**Robin Mitchell** – regarding delays causing displacements, advocated for rent moratorium and just cause eviction, urged review of Human Relations Commission (HRC) resolution presented at December Council meeting.

**Howdy Goudey** – regarding need for measures that can apply under Costa-Hawkins, support of a complete package, that will provide equal protections to tenants and landlords

**Sherry Drobner** – regarding importance of data on mom and pop landlords, study sessions not allowing for public dialogue, support of HRC resolution task force, temporary rent cap and just cause eviction.

**Ilona Clark** – regarding support of just cause, opposition of that further restricting housing amid a housing shortage. Supportive of a rent registry.

**Rhovy Lyn Antonio** – CA Apartment Association, regarding member concerns on rent trigger for relocation and just cause eviction, concerns about lack of process and being a form of rent control.

**Jeffrey Wright** – regarding just cause as a precursor to rent control, Richmond’s program, facts from recent election and Richmond Council actions, and support of staff recommendation.

**Jeffrey Levin** – regarding support of just cause and rent registry, but not of taking action tonight, consideration of costs, and request for interim protections for tenant.

**Peter Pan** – regarding opposition of just cause and challenge with eviction.

**Council Discussion:**

**Councilmember Lyman** – stated support for more time to work on full package. Clarified that the Council was not considering just cause tonight. Stated a desire to focus on displacement. Want to avoid consequences of tougher screening at the application phase. Stated desire and goal of limiting displacement of current population.

**Councilmember Abelson** – Stated concern about rushing through comments last discussion. Meeting with staff that can provide more open dialogue with the public but limited for Council attending because of the Brown Act; clarified terms for eviction.

**City Attorney Woodruff** - Stated that several workshops were held before bringing this to Council in December. Holding additional workshops could be a challenge as it would increase the timeline.
Mayor Pardue-Okimoto – stated believe that El Cerrito voted in favor of Measure 10 because they feel rents are out of control and want to protect those being displaced. Reported that there is work being done on state wide laws on these issues, and summarized elements being focused on. Expressed desire for fair return for landlords, but protection of renters.

**Action:** Passed a motion to approve the staff recommendation as proposed, amending item number three to include the return date of February 19th.

**Moved/Seconded:** Councilmembers Lyman/Quinto  
**Ayes:** Mayor Pardue-Okimoto; Councilmembers Abelson, Fadelli, Lyman, and Quinto  
**Noes:** None

B. Annual Review of Comprehensive Financial Policy  
Presentation by Mark Rasiah, Finance Director.

**Presentation:** Mark Rasiah, Finance Director, presented the staff report and answered questions raised by members of the council.

**Public Comments:**

Marlene Keller – Member of Financial Advisory Board (FAB) regarding importance of time spent reviewing and updating the policy, focusing on reserve policy.

**Action:** Passed a motion to extend the meeting by 15 minutes to 10:45 p.m.  
**Moved/Seconded:** Councilmembers Abelson/Quinto  
**Ayes:** Mayor Pardue-Okimoto; Councilmembers Abelson, Fadelli, Lyman, and Quinto  
**Noes:** None

Dick Patterson – Chair of FAB spoke regarding need for reserve fund.

**Action:** Receive and File.

C. Exclusive Negotiating Right Agreement – 6111 Potrero Avenue and 11335-41 San Pablo Avenue  
Adopt a Resolution authorizing execution of an Exclusive Negotiating Rights Agreement with (“Proposed Purchaser”) for the disposition of 6111 Potrero Avenue and 11335-41 San Pablo Avenue (APNs 513-372-018 and -015)

**Presentation:** Melanie Mintz, Community Development Director, presented the staff report and answered questions raised by members of the council.

**Action:** Passed a motion to extend the meeting by 15 minutes to 11:00 p.m.  
**Moved/Seconded:** Councilmembers Quinto/Lyman  
**Ayes:** Mayor Pardue-Okimoto; Councilmembers Abelson, Fadelli, Lyman, and Quinto  
**Noes:** None

Deepak Agarwal, potential purchaser, provided the council with an overview of restaurant ownership and experience.
Public Comments:

Robin Mitchell – expressed disappointment property not used for affordable housing and questioned public process for bidding.

Jeff Levin – Look forward to redevelopment of property, shared concerns about public process and affordable housing options.

Kim Marienthal – Co-developer for proposed project spoke on benefits of the project.

Action: Passed a motion to extend the meeting by 10 minutes to 11:10 p.m. Moved/Seconded: Councilmembers Abelson/Quinto Ayes: Mayor Pardue-Okimoto; Councilmembers Abelson, Fadelli, Lyman, and Quinto Noes: None

Action: Passed a motion to adopt Resolution No. 2019-02. Moved/Seconded: Councilmembers Lyman/Quinto Ayes: Mayor Pardue-Okimoto; Councilmembers Abelson, Fadelli, Lyman, and Quinto Noes: None

8. CITY COUNCIL LOCAL & REGIONAL LIAISON ASSIGNMENTS

Councilmember Lyman – Financial Advisory Board discussing regarding real property tax and governance of measure V. Crime Prevention Committee has several sub committees, including one focused on membership recruitment and one on revitalizing neighborhood watch program.

9. ADJOURN REGULAR CITY COUNCIL MEETING

The meeting was adjourned at 11:01 p.m.

Rochelle Pardue-Okimoto, Mayor

This is to certify that the foregoing is a true and correct copy of the minutes of the special and regular City Council meetings of January 15, 2019 as approved by the El Cerrito City Council.

Holly M. Charléty, MMC, City Clerk
Date: March 5, 2019
To: El Cerrito City Council
From: Human Relations Commission by Kristen Cunningham, Staff Liaison
Subject: Recognize March 10, 2019 as the 60th anniversary of the Tibetan national uprising, and affirm support to the people of Tibet

**ACTION REQUESTED**
At the request of the El Cerrito Human Relations Commission, adopt a resolution declaring 1) March 10, 2019, the 60th anniversary of the Tibetan national uprising, as “Tibet Day” in the City of El Cerrito and display the Tibetan flag at City Hall; and 2) Declaring El Cerrito’s expression of solidarity with the Tibetan people and their just, peaceful, and non-violent movement to remind the world of the ongoing suppression of human rights and freedom in Tibet and the continuous degradation of culture, religion, land, and identity of the Tibetan people by China.

**BACKGROUND**
This year continues the dedication of the Tibetan community around the world to remind us about the ongoing plight of Tibet so that the just cause of Tibet is not forgotten. The recent human rights abuses in Tibet are another example of the continued violent suppression of a movement for democracy in Tibet. It is also one aspect of China’s continued serious contravention of the Tibetan people’s right to religious and cultural freedoms.

It is important that the City of El Cerrito oppose the Chinese government’s campaign of violent suppression and stand up for human rights and democracy in Tibet. The City of El Cerrito has a long history of support for Tibet and the Tibetan people, and the Human Relations Commission has requested a resolution from the City Council that shows support for affirming the determination of the Tibetan people in Tibet and beyond, including Tibetan Americans, to retain their heritage and protect it from destruction against overwhelming odds through non-violent and peaceful means.

**STRATEGIC PLAN CONSIDERATIONS**
Adoption of this resolution will help fulfill the following City of El Cerrito Strategic Plan Goals:
- Goal C: “Deepen a sense of place and community identity” and the objective of “Celebrate the City’s diversity by welcoming residents of all ages and cultures and encouraging their civic involvement”
**FINANCIAL CONSIDERATIONS**
There are no costs to the City associated with this action.

**LEGAL CONSIDERATIONS**
The resolution has been reviewed and approved by the City Attorney.

RESOLUTION 2019-

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF EL CERRITO
RECOGNIZING MARCH 10, 2019 AS “TIBET DAY” IN THE CITY OF EL
CERRITO AND AFFIRMING SUPPORT TO THE PEOPLE OF TIBET

WHEREAS, On March 10, 2019, Californians, including Tibetan Americans, residing in El Cerrito and surrounding regions will gather to commemorate the 60th anniversary of the Tibetan National Uprising against Chinese invasion and occupation of Tibet; and

WHEREAS, the City of El Cerrito has a diverse ethnic population, including Tibetan Americans, who are concerned about human rights and freedom in the United States and throughout the world, and

WHEREAS, the United States has a long history of support to the Tibetan people, including the passage of the Tibetan Policy Act of 2002 (subtitle B of title VI of Public Law 107–228; 22 U.S.C. 6901 note), signed into law on September 30, 2002, which encapsulates policy and programmatic initiatives and supports the aspirations of the Tibetan people to safeguard their distinct identity; and

WHEREAS, on October 17, 2007, His Holiness the 14th Dalai Lama was awarded the Congressional Gold Medal in recognition of his many enduring and outstanding contributions to peace, nonviolence, human rights, and religious understanding; and

WHEREAS, the Tibetans living in El Cerrito were pleased to welcome His Holiness the Dalai Lama, a true champion of world peace and religious harmony, when he visited the Tibetan Community Center in Richmond in February 2014; and

WHEREAS, The State Department’s 2017 Country Reports on Human Rights Practices said this about the situation in Tibet: “The most significant human rights issues included: disappearances; torture by government authorities; arbitrary detentions, including political prisoners; and government curtailment of the freedoms of speech, religion, association, assembly, and movement”; and

WHEREAS, Tibetan Americans, including those residing in El Cerrito, have been expressing concern at the Chinese Government’s:
(1) travel restrictions against Tibetans and United States citizens;
(2) restrictive regulations on religious affairs in Tibet;
(3) censorship of Buddhist literature and information in Tibet;
(4) demolition of Tibetan Buddhist sites;
(5) imprisonment of Tibetan prisoners of conscience; and
(6) declarations that “Decision-making power over the reincarnation of the Dalai Lama and over the end of survival of his lineage resides with the central government of China”; and

WHEREAS, Tibetan Americans residing in California have been facing discrimination at the hands of Chinese consulates while applying for visas to visit Tibet; and

WHEREAS, the Reciprocal Access to Tibet Act passed by Congress and signed into law on December 19, 2018 highlights China’s attempts to isolate Tibet and seeks to promote access for United States diplomats and other officials, journalists, and other citizens, including Tibetan Americans, to Tibet; and

WHEREAS, since 2009, 155 Tibetans have self-immolated to protest against China’s rule in Tibet and most Tibetans publicly call for the return of the Dalai Lama to Tibet; and

WHEREAS, the city of El Cerrito has a long history of support for Tibet and the Tibetan people; and

WHEREAS, The El Cerrito City Council affirms the determination of the Tibetan people in Tibet and outside, including the Tibetan Americans, to retain their heritage and protect it from destruction against overwhelming odds through non-violent and peaceful means:

NOW, THEREFORE BE IT RESOLVED by the City Council of the City of El Cerrito that March 10, 2019, the 60th anniversary of the Tibetan national uprising, shall be officially recognized as "Tibet Day" and the Tibetan flag shall be displayed at City Hall.

BE IT FURTHER RESOLVED that El Cerrito City Council supports the initiatives on Tibet in the United States Congress.

BE IT FURTHER RESOLVED, that the City of El Cerrito stands in solidarity with His Holiness the Dalai Lama, the Tibetan people and their just, peaceful, and non-violent movement to remind the world of the occupation and ongoing suppression of human rights and freedom in Tibet and the continuous degradation of culture, religion, land, and identity of the Tibetan people by China.

I CERTIFY that at a regular meeting on March 5, 2019, the City Council of the City of El Cerrito passed this Resolution by the following vote:

AYES: COUNCILMEMBERS:
NOES: COUNCILMEMBERS:
ABSTAIN: COUNCILMEMBERS:
ABSENT: COUNCILMEMBERS:

IN WITNESS of this action, I sign this document and affix the corporate seal of the City of El Cerrito on March XX, 2019.

Holly M. Charléty, City Clerk

APPROVED:

_____________________
Rochelle Pardue-Okimoto, Mayor
Committee of up to 15 citizens
- Chair Mark Miner, Vice-Chair Rebecca Milliken, Howdy Goudey, Elizabeth Molnar, Alison Moreno, Sean O'Connor, Paloma Pavel, Renée Solari, Jeff Sobui, Ellen Spitalnik, Sheila Tarbet, Neil Tsutsui, Gisele Verrier, David Weinstein

Meet 2nd Tuesday, 7 PM, City Hall

Mission:
- To educate, inspire, and activate our community to sustainably thrive
Role of the EQC

- To serve in an advisory capacity to City Council, staff and other committees with regard to environmental quality issues in El Cerrito.
- To recommend programs and policies to the City Council.
- Foster public awareness, education and interest in the City’s environmental quality efforts.

EQC Goals

1. Promote environmental education, action, equity, & justice
2. Involve learners of all ages
3. Help residents and businesses live more sustainably
4. Inform and champion City’s environmental efforts
5. Support GHG emissions reductions (Climate Action Plan)
6. Reduce waste by encouraging Reduction, Reuse, Recycling and Composting
7. Champion energy/water efficiency, renewable energy generation, and efficient transportation
8. Minimize hazardous chemical use
9. Protect, expand and steward open green space
10. Support healthy creeks and forests, & green infrastructure
EQC & City’s Strategic Plan

Goal F: Foster environmental sustainability citywide

- Be a leader in setting policies and providing innovative programs that promote environmental sustainability.
- Promote environmental education to facilitate behavioral changes by working with the school district and other community groups.
- Implement policies to promote waste diversion (i.e., mandatory commercial recycling and green waste).
- Encourage alternative modes of transportation to the single occupancy vehicle.
- Implement and monitor the City’s Climate Action Plan (CAP) to:
  - Reduce vehicle miles traveled
  - Facilitate energy and water efficiency and greater use of clean energy
  - Reduce the amount of waste generated in El Cerrito
  - Make municipal operations more resource efficient and environmentally friendly

Past EQC Accomplishments

- Supported policy developments and hosted public forums:
  - Climate Action Plan – 2013
  - Single-Use Plastic Bag and EPS Foam Take Out Container Bans – 2013
  - Community Choice Aggregation – 2014
  - Priority Conservation Areas – 2015
  - Pollinator Safe Community Resolution – 2015
  - Urban Greening Plan – 2015
  - Cool CA, earned $2,700 – 2016
  - Discussed reforming User Utility Taxes (UUT) to reflect carbon emissions – 2017
EQC 2018 Accomplishments

Community Outreach
- Volunteer Appreciation and EQC 10th Anniversary Party
- Green Teams volunteer events
- Eco-film series, lectures and workshops
- 100% renewable energy outreach
- Annual Hillside Festival
- Participation in City events
  - Earth Day
  - Bike to Work Day
  - 4th of July

Programs and Events
- National Drive Electric Week event
- Butterfly and Pollinator Workshop
- Fix-it Clinics at the El Cerrito Library
- SunShares program and workshop
- Film showing (“Tomorrow”) and panel discussion on Climate Change
- 5th Annual Hillside Festival
- Volunteer Appreciation Event and EQC 10th Anniversary Party
- Presentation on Electrification
- City Nature Challenge
EQC 2018 Accomplishments

- Climate Action Implementation
  - On-going Deep Green outreach with MCE’s “Living Lightly” Initiative
  - Supported Municipal opt-up to Deep Green
  - Supported El Cerrito to become MCE “Deep Green Champion”

2019 Work Plan
Public Education and Outreach

- Declare 2019 the Year of Plastic Pollution Prevention
  - Develop programs or policies to help reduce single-use plastics (e.g. straws)
  - Contribute to trash mitigation strategies
  - Plastic Free July

- Hold at least two film and/or lecture/workshop events
  - Plastic waste in oceans
  - Household toxics reduction
  - Electrification of buildings and transportation
  - Water conservation and energy efficiency programs
2019 Work Plan
Public Education and Outreach

- Programs and Events
  - Bay Area SunShares Participation
  - Drive Electric Week Events
  - East Bay Electrification Expo
  - 6th Annual Hillside Festival
  - Co-host Three Fix-it Clinics
  - “Bio-Blitz” Event in the Hillside Natural Area
  - Tabling at City Events (4th of July, Earth Day, etc.)
  - Develop New Outreach Materials

Volunteer Work Parties

- Hosting nine Green Teams Work Parties
- Continue Partnership with PG&E to restore and maintain habitat on Moeser power line corridor
  - Earth Day Native Plant protection work party
  - Additional emphasis on vegetation management
2019 Work Plan
Policy Development

- Policy Development and Advice
  - Reduction of Single-use Plastics Food Ware, including Straws and Stirrers
  - Review Environmental Purchasing Policy
  - Support use of Electric Vehicles and “EV” Infrastructure
  - Climate Action Plan (CAP) Implementation
    - Review/update CAP goals and accomplishments
    - Explore electrification to reduce residential and commercial natural gas usage
    - Engage budget process to be inclusive of CAP goals
    - Support City staff in data collection and analysis of CAP metrics

2019 Work Plan
Support City Programs

- Support Related City Programs
  - Promote Real Property Transfer Tax Rebates for Energy Efficiency Improvements
  - Support Acquisition of Public Open Space
  - Support Fire Mitigation Strategies in Hillside Natural Area
  - Support EV Infrastructure Deployment
  - Support Trash Mitigation Strategies
  - Review How City Cares for its Creeks
  - Expand Stewardship of Hillside Natural Area

Environmental Quality Committee

2019 WORK PLAN

AND

2018 ACCOMPLISHMENTS

Members:  Chair Mark Miner, Vice-Chair Rebecca Milliken, Howdy Goudey, Elizabeth Molnar, Alison Moreno, Sean O’Connor, Paloma Pavel, Renée Solari, Jeff Sobul, Ellen Spitalnik, Sheila Tarbet, Neil Tsutsui, Gisele Verrier, David Weinstein
MISSION STATEMENT:

The Environmental Quality Committee’s mission is to educate, inspire, and activate our community to sustainably thrive.

Because the City of El Cerrito recognizes that environmental quality is an important issue that demands immediate and ongoing attention, the Environmental Quality Committee (EQC) was established in 2008 by Resolution 2008-13, as a Council-appointed body of up to 15 El Cerrito residents and business owners. It meets every 2nd Tuesday of the month at 7 PM in City Council Chambers. The enabling resolution identifies the whole City’s role and responsibility in reducing environmental impact, as well as demonstrating environmental leadership and affecting cultural change in the way that the City and its citizens relate to the environment.

The EQC duties and responsibilities, as stated in its enabling resolution, are:

1. To serve in an advisory capacity to the City Council, staff, other boards, commissions, and committees, and the citizens of the City with regard to environmental quality issues within the City of El Cerrito
2. To recommend programs, policies, and ordinances to the City Council and promote the City's environmental quality efforts
3. Promote and foster public awareness, education, interest and support for environmental quality efforts, foster volunteer opportunities, and educate El Cerrito citizens regarding environmental quality and issues relating to environmental impacts

The EQC goals are:

1. Promote environmental education, action, engagement, equity, and justice
2. Involve learners of all ages
3. Help businesses and residents live in a more sustainable and environmentally friendly fashion
4. Inform and champion the City’s environmental policies and ordinances
5. Reduce greenhouse gas emissions to meet and exceed targets of the El Cerrito Climate Action Plan (and propose revised goals, as appropriate)
6. Change material use patterns by encouraging Reduction, Reuse, Recycling, and Composting
7. Champion energy/water efficiency, renewable energy, and sustainable transportation
8. Minimize hazardous chemical use and human/environmental exposures to toxics
9. Protect, expand and steward green spaces with public path/trail connectivity, maintain and restore natural areas with an emphasis on native ecosystems, and encourage a network of human/wildlife friendly green habitat throughout the city
10. Support water quality, healthy creeks and forests, and green infrastructure to increase resiliency in the face of climate change
The EQC’s work is guided by the 2015-2020 El Cerrito Strategic Plan (excerpt below):

**Goal F: Foster environmental sustainability citywide**
- Be a leader in setting policies and providing innovative programs that promote environmental sustainability.
- Promote environmental education to facilitate behavioral changes by working with the school district and other community groups.
- Implement policies to promote waste diversion (i.e., mandatory commercial recycling and green waste).
- Encourage alternative modes of transportation to the single occupancy vehicle.
- Implement and monitor the City’s Climate Action Plan to:
  - Reduce vehicle miles traveled (by creating a well-connected, pedestrian, bicycle and transit-oriented urban forms that will make it easier for residents and visitors to leave their car behind.)
  - Facilitate energy and water efficiency and greater use and generation of clean energy
  - Reduce the amount of waste generated in El Cerrito
  - Make municipal operations more resource efficient and environmentally friendly

**HISTORICAL BACKGROUND:**
The EQC was established in 2008. Over the ten year history of the EQC, the committee emphasis has occasionally cycled between public education, organizing community volunteer engagement, and environmental policy, but there has generally been a consistent commitment to all forms of action envisioned for the EQC over time. The committee has also remained a fairly consistent size, with a number of long-serving members. Over 40 community members have served, and the committee reached its full 15-member capacity during 2018, with only one vacancy as 2019 opens. This means the EQC is experiencing its highest levels of community participation and engagement in its 10 years.
**2019-20 WORK PLAN**

<table>
<thead>
<tr>
<th>OBJECTIVE</th>
<th>PROPOSED ACTIVITIES</th>
<th>PRIORITY RANKING</th>
<th>TIMELINE FOR COMPLETION</th>
</tr>
</thead>
</table>
| **1. Public Education and Outreach** | a) Declare 2019 Year of Plastic Pollution Prevention  
 b) Host at least two public events (e.g. films, lectures, or workshops)  
 c) Continue 100% renewable Deep Green power enrollment outreach, particularly to businesses  
   o Encourage “Living Lightly” teams to form in El Cerrito  
 d) Participate in events and programs that encourage electrification of buildings and transportation (e.g. Bay Area SunShares program to increase rooftop solar and EV adoption, National Drive Electric Week, and a regional Electrification Expo)  
 e) Co-sponsor the Hillside Festival and other related hikes and educational events  
 f) Co-sponsor Fix-it Clinic events  
 g) Support Citizen Scientist activities to increase awareness of El Cerrito’s biodiversity  
 h) Table at major city events, and perform other outreach activities to spread awareness of EQC  
 i) Develop new collateral (e.g. welcome packet) and communications strategies to increase public engagement | 1 | 1 year (ongoing) |
| **2. Volunteer work parties** | a) Hold a Green Team work party every other month (~6/year); diversify work party activities  
 b) Continue partnership with PGE to restore and monitor habitat on the Moeser power line corridor, with additional emphasis on vegetation management to reduce the potential for and severity of wildfires | 1 | 1 year (ongoing) |
| **3. Policy development and advice** | a) Develop policy/programs to support the reduction of single-use plastics, particularly in food ware  
 b) Revise/update the environmentally preferred purchasing policy  
 c) Support use of EVs and infrastructure in city operations, as well as charging infrastructure | 1 | 1-2 years |

<td></td>
</tr>
<tr>
<td></td>
<td>d) Supported the City Council’s idea to offer partial rebates on the potential Real Property Transfer Tax for energy, environmental, and other upgrades</td>
<td></td>
</tr>
<tr>
<td></td>
<td>e) Hosted presentations on plastic pollution and on the City’s waste diversion program</td>
<td></td>
</tr>
<tr>
<td>4. Support of environmental related city programs</td>
<td>a) Climate Action Plan review and implementation (100% renewable deep green enrollments)</td>
<td>Completed</td>
</tr>
</tbody>
</table>
## ONGOING PROJECTS

<table>
<thead>
<tr>
<th>PROJECT</th>
<th>ACTIVITIES</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1. Green Team Work Parties</strong></td>
<td>Coordinate roughly six trash clean-up events each year in various city parks, the Ohlone Greenway and city streets. Organize other volunteer work parties focused on weed/invasive plant removal, pollinator habitat restoration/stewardship, tree planting (in collaboration with the Urban Forest Committee and City arborist) and maintenance/stewardship of the Hillside Natural Area.</td>
</tr>
<tr>
<td><strong>2. Hillside Festival</strong></td>
<td>Assist Trail Trekkers in the production of the annual event celebrating the Hillside Natural Area with many hikes, talks, and activities.</td>
</tr>
<tr>
<td><strong>3. Climate Action Plan implementation and progress metrics</strong></td>
<td>Work with city staff to evaluate successes and opportunities as we further implement the Climate Action Plan. Explore opportunities to reduce residential natural gas use, and promote electrification of home appliances and automobiles as a complement to 100% renewable electrical power. Outreach to businesses to opt up to 100% renewable power. Improve municipal EV infrastructure/readiness and fleet management.</td>
</tr>
<tr>
<td><strong>4. Water efficiency/resiliency</strong></td>
<td>Education and incentives to use greywater and rainwater collection. Potential to do outreach to new multifamily developments on water efficiency.</td>
</tr>
<tr>
<td><strong>5. Urban Greening implementation</strong></td>
<td>Volunteer work parties and policy/program development to strengthen pollinator habitat and green infrastructure. Continue the partnership with PGE on the Moeser transmission corridor to provide stewardship and monitoring of plant species being managed.</td>
</tr>
</tbody>
</table>
| **6. Future Projects Ideas/Areas to Explore (2019/2020)** | a) Liaise with other city commissions/committees to ensure sustainability considerations. Increase EQC participation on related topics in City budget process.  
b) Explore environmental benefits/impacts of new development.  
c) Explore the creation of a tool lending library.  
d) Host additional volunteer appreciation parties.  
e) Explore a solar access ordinance and net hardscape policy.  
f) Develop welcome package and information for new residents and businesses.  
g) Add EQC awards for sustainable/green businesses.  
h) Explore unit-level metering for electricity and all-electric unit incentives.  
i) Participate in regional climate action information sharing and coordination. |
SUPPLEMENTAL AGENDA REPORTS AND CORRESPONDENCE

ADJOURNED CITY COUNCIL MEETING
March 5, 2019

AGENDA ITEM 1(A) – Adjourned from February 19, 2019 regular meeting
Tenant Protections Study Session: El Cerrito 2017 Affordable Housing Strategy, Pillar B: Reduce the Risk of Displacement and Help Stabilize At-Risk Populations

1. Public comments received after publication of the agenda packet

2. Materials provided at the meeting under public comment
February 23, 2019

Dear Mayor Pardue-Okimoto and City Council members,

On March 5th you will have the opportunity to discuss the important item of tenant protections. I ask that you borrow from the facts that are at your disposal. These facts have been uncovered by your own city staff and can be found in the Affordable Housing Strategy http://www.el-cerrito.org/DocumentCenter/View/8637/Affordable-Housing-Strategy-Revised_08-31-2017

The Housing Element notes that many market-rate housing units in El Cerrito are unaffordable to extremely low-, very low-, and low- and moderate-income households. As of 2010, more than one-third all El Cerrito households were cost burdened or spent more than 30 percent of their income for housing, and 17 percent spent more than 50 percent of their income on housing. Renters are more likely to be cost-burdened than homeowners (Figure 3). This dynamic is likely to have worsened given recent housing price increases. The average asking rent for an apartment in El Cerrito increased by 39 percent between 2010 and 2017, to an average of $2,151 in June 2017, although no new units came onto the market during this time period (Figure 4). In comparison, Contra Costa County’s average rent has increased slightly more (by 44 percent since 2010), but remains slightly lower at $1,909 in June 2017. as well as additional information cited by your own Human Rights Commission in their resolution providing a recommendation to you. (Page 10)

On December 18th, 2018, the Human Relations Commission issued a recommendation to the city council including the following facts:

- The majority of El Cerrito renters spend more than 35% of their household income on rent
- Research has found that those who spend more than 35% of their household income on rent are twice as likely to be hospitalized for hypertension and twice as likely to be hospitalized for mental illness
- Research has found that those who spend more than 35% of their household income on rent are twice as likely to be hospitalized for hypertension and twice as likely to be hospitalized for mental illness
- Research has found that one of the most effective ways to increase public health is to increase housing quality and decrease housing insecurity because of how directly
housing insecurity has been found to impact physical and mental health

Based on these facts, you have at hand the opportunity to improve the lives of the renters in El Cerrito. But based on the meeting of February 19th, it also appears that you have some fearful landlords who admittedly want to protect their investments.

But this is a false paradigm; it does not either protect the investments of vulnerable landlords or protect the health and diversity of our city and vulnerable tenants.

The Human Relations Commission set forward a set of recommendations that have been woefully ignored by the city council. These recommendations include:

1. Immediately establish “Just Cause Eviction” policies specifically detailing the only circumstances under which a landlord may evict a tenant; and
2. Immediately establish a temporary measure limiting rent increases to be within a certain percentage to protect tenants from rent gouging, which will be in place pending the adoption of rent control ordinances; and
3. Immediately establish a permanent citizen board or commission equally represented by citizen renters, landlords, and homeowners to advise the City Council on matters of the housing; and
4. Immediately establish a citizen-led task force (separate from the above-described board or commission) specific to the topic of tenant protections to be in existence for the full duration of the time period in which the City Council and City Staff is researching, developing, and implementing the Affordable Housing Strategy, to work alongside the City of El Cerrito to provide a direct and consistent access point for citizen input and advisory on matters of tenants’ rights and protections; and
5. The above actions are to be utilized by the City Council as a means of information, education, and advisory regarding the full scope and impact of housing as a basic human right, with data and feedback to be collected and considered by the City Council at six-month increments.

(See for full HRC Resolution on Tenant Protections) https://www.el-cerrito.org/ArchiveCenter/ViewFile/Item/4663  The recommendations above are in the mainstream with many of the proposals now being contemplated by regional organizations and the State of California.

Regionally, CASA- The Committee to House the Bay Area, published their CASA Compact, a series of recommendations derived from discussions of various stakeholders. https://mtc.ca.gov/sites/default/files/CASA_Compact.pdf

Recommendations included:

Just Cause Eviction
Rent Cap
Rent Assistance and Access to Legal Counsel
The State of California is contemplating measures to address the housing crisis as well. One possible measure on the table follow could model the recently passed anti-rent gouging bill passed in Oregon. [https://www.kqed.org/news/11728558/if-california-pursues-a-cap-on-rent-increases-how-many-tenants-will-it-actually-help](https://www.kqed.org/news/11728558/if-california-pursues-a-cap-on-rent-increases-how-many-tenants-will-it-actually-help)

Assemblyman David Chiu, the co-author of the failed Proposition 10, supports the idea of a ban on rent gouging. According to the article, “Chiu stresses that any rent-gouging bill would need to be part of more comprehensive tenant protections and that other more stringent rent control measures are still a possibility.”

The anti-rent gouging language is similar to the CASA rent cap proposal and similar to a UC Berkeley report: Finding Common Ground on Rent Control, released last year after meeting with both landlord and tenant groups. [https://ternercenter.berkeley.edu/finding-common-ground-rent-control](https://ternercenter.berkeley.edu/finding-common-ground-rent-control)

**Please move forward: Place the HRC Resolution on the agenda for your March 5th meeting and discuss their recommendations. Take action and adopt a temporary anti-rent gouging measure ordinance and just cause eviction ordinance. Convene community members to review specifics for a long term solution.**

Sincerely,

Sherry Drobner, Ed.D.

El Cerrito
Dear council member,

As a homeowner in El Cerrito, I definitely oppose rent control and just cause eviction in El Cerrito because this will cause the negative affect to community. Please DO vote NO. Thank you!

Best regards,
Dallon Wang
Dear Council Members:

I am an El Cerrito resident with 22 years of residency. I own a duplex in El Cerrito. My monthly payment of mortgage, insurance, property tax on the duplex is $4165.76 and I receive $3800.00 in rent. I am keeping the rent lower than market as I am living next to my tenants and I want to keep these good tenants. I am hoping that someday my mortgage will be paid off and I will have some supplemental income for my retirement.

84% of housing providers in El Cerrito are Mom and Pop owners like me. Many of them are senior citizens putting in their life savings to support their retirement. Some of them live in the same building of their tenants. As you heard in our last policy discussion in the city chamber, JCE and RC may force some of these providers to withdraw from housing market, jeopardizing their retirement and reducing the number of available housing units for tenants.

Those who remain in market will be very selective in choosing their tenant as the stake of a bad tenant will be many folds bigger under JCE than in normal situations. The result is that those who are most in need of housing will have great difficulties in renting a place.

With rent control, we can no longer afford to give discount to good tenants as we have to treat good and bad tenant the same and raise their allowable rents every year to avoid getting stuck in low rents.

If our hands are tied in dealing with bad tenants, good tenants will either leave or suffer and our community will suffer too.

I understand that you all have good intentions, but please think about the unintended bad consequences JCE and RC will bring. Our city also can hardly pay our bills, spending on these bad programs will make our dire finance situation worse.

Sincerely yours

Peter J. Pan
Dear council member:
El Cerrito is beautiful city. There aren’t many apartments on rental market.

Keep safe and secure as well as peaceful environment are very important for residents. Any policy or regulations shall not encourage those evil thoughts or bad behavior.

Establish good relationship is crucial and essential. Rental control might cause too much issue which city may not be able to handle.
Rental control is not necessary in our lovely El Cerrito.

I oppose rent control and just cause eviction in el cerrito, please vote NO. Thank you!

Subject: I oppose rent control and just cause eviction in el cerrito, please vote NO. Thank you!

Dear Council Members,

I oppose rent control and just cause eviction in el cerrito, please kindly vote NO. Thank you!

We saw from the last city council meeting, many property owners in El Cerrito are families & elderly. Over 80% of housing providers are Mom and Pop owners, including many single family residences. Many senior citizens have invested their life savings in small properties to supplement their retirement. Some of them live in the same building with their tenants. JCE and RC may jeopardize their retirement and force some of these providers to withdraw from the housing market, reducing the number of available housing units for tenants.

Those who remain in the market would become very selective in choosing their tenants, as the stake of a bad tenant would be much bigger under JCE than in normal situations.

With rent control, Owners could no longer afford to give discount to good tenants, afraid of not able to raise the allowable rents when necessary.

You all have good intentions. Please think about the unintended serious consequences JCE and RC may bring to both Providers & Tenants, harming both sides.

Let's work together for a solution that would benefit everyone in our city. A better proposal such as generating a housing fund or housing voucher program which directly assist low income residents would work much better. JCE & RC will kill housing, which our city cannot afford.

Best regards,

Angela Xu

Dear Council Member,

We saw from the last city council meeting, many property owners in El Cerrito are families & elderly. Over 80% of housing providers are Mom and Pop owners, including many single family residences. Many senior citizens have invested their life savings in small properties to supplement their retirement. Some of them live in the same building with their tenants. JCE and RC may jeopardize their retirement and force some of these providers to withdraw from the housing market, reducing the number of available housing units for tenants.

Those who remain in the market would become very selective in choosing their tenants, as the stake of a bad tenant would be much bigger under JCE than in normal situations.

With rent control, Owners could no longer afford to give discount to good tenants, afraid of not able to raise the allowable rents when necessary.

Dear Council Member:

I am a new immigrant. I am looking for a place to live. I want to buy a 2 - 4 unit building in El Cerrito so that I can live there and get some income from renting other units. But if the city has a Rent Control and Just Cause Eviction Ordinance, I would hesitate to choose El Cerrito because it would be too risky. The reason I come here is to seek freedom and private property rights. This is my real thought. Also this is other immigrant’s thought.

Market economy has its own laws. Please don’t try to meddle with it. Thank you.

Yours Sincerely
George

Hello,
Below are two issues I am concerned about:

1) One of the reasons we have this awesome pipeline of housing developments planned along San Pablo Ave. is because El Cerrito DOES NOT have rent control. These developments will go a long way to address the real cause of high rental rates. My guess is that the proposed rent control measures would kill quite a few of these developments before they even get off the ground and stop new ones from being planned. I hope that I am preaching to the choir when I say that rent control makes the housing shortage WORSE! You would be hard pressed to find responsible city planners who would proclaim that rent control works. It does not! I can offer a personal example. I have been renting out a condo in Marina Bay in Richmond for several years. Because of Richmond’s new tenant eviction fees, I have decided to take my unit off the market and sell it. I would never evict a tenant in the middle of a lease. However, when the lease is up, I should have the right to use the unit myself or sell it without paying the existing tenant $14,000! As a result of Richmond’s new policies, I can tell you for sure that there is at least one less rental unit available in their city! Rent control in El Cerrito will both kill new developments and eliminate units that are currently rented. Offering carrots to encourage new developments, affordable units and ADU’s is a much better approach. Until now, it seems like the city has been on the right track.

2) The graffiti in my El Cerrito Plaza neighborhood has taken a big turn for the worse in the last month. I’m sure the crime associated with the tags is up as well as evidenced by the car that crashed through the front doors of Pic N Pac liquor and a big new tag on their fence. It really seems like El Cerrito puts a low priority on keeping the graffiti cleaned up. As an example, the “City of El Cerrito” sign in front of the Chase bank has had a large obtrusive tag on the pole for several months. The information placards for the rain gardens on San Pablo have been defaced for years. If the city isn’t even willing to clean up this obvious stuff, it’s hard to believe there is any real effort going on. The current shot gun approach of addressing tags individually is inefficient and obviously isn't working. It seems like a more proactive comprehensive approach is needed. Perhaps the city could send a crew down San Pablo Ave every two or three months to clean up ALL the tags regardless of whether they are on city property, personal property, utility property, post office property, etc., This would save a lot of money. The labor hours spent per tag would drop dramatically and after a few months, you would find that the number of new tags to clean up would be very limited. Tags attract more tags! I think that if you took a survey of your constituents, you would find that they would prioritize graffiti and blight removal. It doesn’t seem like the city is on the same page on this issue.

Thanks for listening!

Thomas Parent
Dear Mayor Pardue-Okimoto and Members of the City Council:

I do not support Just Cause Eviction, Tenant Relocation with Rent Caps, or the Rent Registry. Instead, I urge you to conduct further studies on El Cerrito’s rental market to truly understand the city’s needs.

As a local housing provider who offers quality, safe housing to my tenants and recognizes our region’s housing challenges, I have significant concerns moving forward with the proposed regulations:

1. THE CITY OF EL CERRITO CAN'T AFFORD THESE PROGRAMS. The city is extremely short-staffed and lacks funding. The city is not structured to administer, operate, and enforce these programs. Adopting the proposals will create a new bureaucracy that the city cannot afford.

2. MANY SMALL MOM AND POPS WILL BE DRIVEN OUT OF BUSINESS. These are the same people who provide naturally affordable house in the city! An overwhelming majority of El Cerrito housing providers have family-owned buildings with a small number of units. They have renters who generally have good relationships with their landlords. Please don't punish us.

3. JUST CAUSE EVICTION IS DANGEROUS FOR NEIGHBORHOODS. It would give bad tenants lifetime tenancies and leave property owners no power to recover the unit even if the tenant behaves badly unless another tenant serves as a witness. Thus, owners will likely be more selective when renting their units.

Instead, we ask that you consider gathering more data to evaluate whether El Cerrito needs regulations such as Just Cause eviction and programs with rent caps. The original proposals for lease offerings and data gathering proposed by city staff at the December 18th meeting was a better approach because it was not punitive against housing providers and would not create a new bureaucracy would add cost to the city, housing providers, and renters.

Thank you for your consideration.
Sincerely,

Lisa Lau
Dear Mayor Pardue-Okimoto and Members of the City Council,

I do not support just cause eviction, tenant relocation payments initiated by rent triggers, and the rent registry. Instead, I urge you to find solutions that can accommodate both housing providers as well as tenants.

At the February 19th meeting, over 100 of my fellow responsible housing providers expressed our opposition to these proposals because of the following:

1. **Just Cause Eviction** will lead to selectiveness in the rental market and overall wariness of mom and pop landlords. We are over 80% of housing providers in the city.

2. **Rent Registry** will be very costly and the city is not equipped to operate this program.

3. **Tenant Relocation Fees** is a form of rent control which has been proven to be the wrong solution to the housing crisis.

We ask that you reconsider these proposals and gather more data instead. More data will allow our community to evaluate whether El Cerrito needs these regulations.

Thank you for your consideration.

Sincerely,

Patricia McGoldrick

Dear Mayor Pardue-Okimoto and members of the El Cerrito Cit Council:

I am sorry I will miss the meeting tomorrow night as we are leaving for Maui in the morning. I had planned on being a speaker at the next meeting, as I had to leave at 9:30 at the February meeting.

I do not support just cause evictions, tenant relocation payments or the rent registry. I do understand there are some landlords that raise existing tenants rent above what is a normal increase, but I am not one of those. One of my tenants is paying $1625 per month for a beautiful 2 bedroom 1 bath apartment with a fireplace and with an enclosed garage with a door opener plus a private patio. Identical units in the same area are renting for $2200 to 2400 per month. I could see limiting rental increases to maybe 5 to 6% per year as I usually use that figure. I pay a business license and pay to have my fire extinguishers inspected by the Fire Department at a cost of $135 for a 10 minute ride from the fire station on San Pablo Ave to my building. I can not afford to have more fees added to my building costs.

I started buying rental real estate in El Cerrito in 1978. I took a risk by doing it as I did not have a dad to sue to get my inheritance to buy real estate. That first property was purchased from one of my insurance clients and I did not have to make a down payment. I had a negative cash flow for years on it. In 1980 I purchased a property on Belmont Ave and took a second for $46,000 on my house for the downpayment. If any of you remember the early 80’s you will recall the high interest rates. The best rate I could get was 14.5% but only a 75% loan. I had a negative cash flow for years. In 1985 I bought another property in El Cerrito and since I had to pay off the second on my house did not have the cash for a down payment. Another second on my personal residence and a negative cash flow for quite a few years. I did this by putting my on residence at risk and I could have lost everything.

I have done almost all of the maintenance on my properties except for painting since I have owned them. I would leave my office and go to the various properties and would work on them in the evenings and weekends. While other people were home relaxing I was working. If I took an afternoon off from the office it was to work on my properties, not play golf or tennis.
We hear we are going to have another big earthquake hit the Bay Area sometime. Who is going to pay my $150,000 deductible on the one property and the $80,000 on the other one? The tenants, the City of El Cerrito, the City Council members? No, I will be the one paying them. I will need a new roof soon on the one building and I am estimating it will be close to $25,000. My insurance costs have gone up by $1500 on one property and $1100 on another one.

Look at what happened to rental properties in Berkeley when rent control when it in the 80’s. Many properties were left vacant or if still rented they became quite shabby.

My rental income is my retirement as I did not have a pension plan being a sole proprietor for the 43 years I worked.

Please reconsider what you are trying to move forward on.

Sincerely,

Richard Lewis
Dear Mayor Pardue-Okimoto, members of the City Council and City Manager Pinkos,

We are owners of one 4 unit apartment building in El Cerrito and members of the vast majority of mom and pop responsible housing providers. We are opposed to the 3 proposals you are studying.

Just Cause Eviction would cause us to be much more wary and selective of prospective tenants. If we were to apply today's selectivity to our current tenants of 3, 20, 21 and 28 years when they applied for their apartments, none would have qualified. They would not benefit from the 25 to 40% below market rates that they enjoy.

Tenant relocation fees is no more than rent control in a different name. At 79 and 78 years old, if we decide to move into one of our apartments where we can walk to the plaza, post office and our bank but have to pay to move into our property...where is the fairness in that? How are we protected from bad tenants and bureaucracy?
Rent Registry is another bureaucratic, time and financial expense that the city, the property owners and the tenants can ill afford. Data should be gathered before considering such a move.

Please do not push us towards selling our property as it would hurt us and certainly hurt the tenants that you think would be protected by the proposals.

Respectfully,

Brenda and Victor Wong
42 year residents of El Cerrito
Dear Council Members,

We saw from the last city council meeting, many property owners in El Cerrito are families & elderly. Over 80% of housing providers are Mom and Pop owners, including many single family residences.

Many senior citizens have invested their life savings in small properties to supplement their retirement. Some of them live in the same building with their tenants. JCE and RC may jeopardize their retirement and force some of these providers to withdraw from the housing market, reducing the number of available housing units for tenants.

Those who remain in the market would become very selective in choosing their tenants, as the stake of a bad tenant would be much bigger under JCE than in normal situations.

With rent control, Owners could no longer afford to give discount to good tenants, afraid of not able to raise the allowable rents when necessary.

You all have good intentions. Please think about the unintended serious consequences JCE and RC may bring to both Providers & Tenants, harming both sides.

Let's work together for a solution that would benefit everyone in our city. A better proposal such as generating a housing fund or housing voucher program which directly assist low income residents would work much better. JCE & RC will kill housing, which our city cannot afford.

Best regards,

Dear Mayor Pardue-Okimoto, Mayor Pro Tem Lyman and Councilpersons Abelson, Fadelli and Quinto:

I am the owner of a small apartment property in El Cerrito, and am one of the 567 “mom and pop” owners in El Cerrito who own apartment properties between two and eight units. I ask you simply, where is the hard data that supports the implementation of the restrictive just cause eviction, tenant relocation and rent registry policies under consideration. Through all of the meetings and discussions over the past several months on the topic of tenant protections, there has been zero hard data, nor any actual facts that supports whether or not El Cerrito actually has a tenant displacement problem. How can a decision be made that will negatively affect each and every “mom and pop” owner in this city without really knowing if a problem exists?

Here are some of the negative consequences that will affect "mom and pop" landlords should these policies be implemented:

1. It will severely limit a “mom and pop” property owner’s ability to maintain a peaceful and safe environment for all tenants. In fact, a problem tenant can make life miserable for all residents, as most are too scared to come forward as witnesses because it can place them and their families in danger. Drug dealers and gang members remain on the property, further threatening others in the building, and in many instances these good tenants have no choice but to move.

2. If Just Cause is implemented, landlords will have no choice but to screen out prospective tenants who may have lower credit scores, lesser incomes and bad or no rental history. This quote, unquote “bad risk” group of tenants will certainly have a more difficult time finding rental housing. If we want to help these tenants find high quality, safe housing, we must create an environment where they are not considered an in-surmountable risk to landlords.

3. It will increase cost burdens on everyone involved, including the “mom and pop” landlords, as well as tenants and the City of El Cerrito, and create unelected regulatory bodies whose priorities become self-perpetuation and funding.

4. It will threaten our local tax base by depressing property values, as owners will have little to no incentive to spend money on capital improvements and property upgrades.

At the end of the day, these proposals do not create one more housing unit in El Cerrito, which is exactly what the city needs in order to help alleviate this affordable housing crisis.

Again I ask. Where is the hard data that supports the fact that El Cerrito has a tenant displacement problem? Before making any rush to judgement decisions, this issue should be studied more closely by establishing a method to actually track instances where tenants are being unfairly displaced by their landlords. The requirement of
imposing a mandatory lease term option actually provides more tenant protection than any Just Cause ordinance can provide.

Rent control policies have the exact opposite effect of what they are intended to accomplish. Three East Bay cities with some form of rent control currently in place, including, Oakland, Berkeley and Emeryville currently have some of the highest rents of any city in the East Bay according to the commercial property research firm Costar.

Please don’t impose Just Cause eviction and unnecessary tenant relocation fees on the hundreds of small, “mom and pop” property owners who provide safe and affordable housing for El Cerrito residents, just because of a perceived problem with a very small group of owners.

Sincerely,

Rich Martini
Dear City Council Members,

I swear, I promise you all—hand on bible or building code or SPASP or whatever you want—that I will not come to a City Council meeting for a whole year once this issue has been handled!

I know that listening to all your constituents must be exhausting, but I just watched the entire February 19th meeting online, since I had to leave early, and also since I (and others) had tremendous difficulty understanding speakers due to the “muddy” sound system. I have to say that I was impressed by the wisdom and suggestions of a great many of the speakers on the tape, and I hope that you were, too.

So here is my final twenty-cents worth (I won’t even speak Tuesday!):

Forget a rent registry that is modeled after those used with rent control. I admit, I was wrong about that. It could cost a fair amount, it could jeopardize tenant privacy, and it might engender lawsuits. Instead, do a mandatory survey—NOT a registry that gives details unneeded in the absence of rent control. I’ve attached an example of what I mean for my own 4-plex, which gives you the data you need without identifying what a particular tenant or apartment pays. Make it mandatory, and send it out with the business license renewal. DONE! And rather cheaply! You will have data within a few months.

In the meantime, to offer some help for any tenant who might need it now, go ahead and set up a “board” of citizens, including tenants and landlords, to provide a safe forum for tenants who are being mistreated to speak. (I could never figure out why you abandoned this idea, an approach that is much-needed these days.) Model it after the simple one in Albany, with the small incidental costs being covered by a little landlord fee as in Albany. For now, until you have data, give this group a nonbinding advisory capacity. These kinds of things have reportedly worked well in other cities, so it seems to be well worth a trial here until we really know if more is needed in El Cerrito.

Those two actions alone would go a long way to helping El Cerrito begin to take care of its existing housing, housing providers, and tenants, and they won’t cost much or draw legal objections and more adversarial actions.

FINALLY, consider setting up a City-wide tenant emergency fund, at least for the short term.
This would likely have to be overseen by a City staff member, but could perhaps be kept down to a minimal cost. It also should probably have clear guidelines for qualifying, e.g., a big rent increase that threatens a tenancy. If the council does this, I will donate the first $100 myself, and will guarantee that I can get that amount to $1000 (and more) in two days. You could even ask for small donations on the survey with the business license, because I think many landlords might want to contribute to such a fund, being the decent citizens that I maintain most of them are.

That's it! Best wishes to you all in your decision-making. I hope you do the right thing, and thank you for your service to the community,

Elizabeth (B.J.) Thorsnes

Subject: Tenant Laws for El Cerrito

Dear Gabriel Quinto,

I am an El Cerrito resident for the past 13 ½ years and plan to have this be my last home. I have been very surprised to hear about the rent provisions that you are considering adopting for El Cerrito. One of El Cerrito’s charms is that it is the size of a town. Everyone knows their neighbors and their elected officials. It has been responsive and a reflection of its residents. It has been the model of participatory democracy while I have lived here.

I was thrust into being a small time landlord in 1999 through the legal separation of myself and the father of my children. He was financially trying his hardest to destroy me and leave me with no means of raising our children because after a 13 ½ year relationship and my business we shared, the money was his, right? I endured 7 years of lawsuits. In the end, the only why to manage my life was to keep the money the courts assigned me in real estate since it was coming from the dissolution of commercial rental real estate holdings he had. I was only given loans for small properties because I was not a management company with experience. I have kept the properties I was able to buy in my own name for 20 years. I didn’t panic and go the LLC route. I knew that decent business practices and cooperation with the renters was the way to have a good life. I had been a renter most of my adult life, so I knew that the apartment I offered was my tenants’ home and that they were my partner in trying to get through this busy modern world. It worked.

I lived in one of the apartments myself with my children. Managing your own buildings is considered “investment income” and no matter how many hours you put into managing, cleaning, painting, repairing, paying bills, refinancing to keep my expenses and hence rents low, it is never legally “income” and so none of my savings could go into a tax free IRAs for retirement savings. It was assumed I was well off and just scraping money off the top. I did not have enough money to hire a manager so I just worked incredibly hard and learned on the job and did it myself.

Along the way I received many thank you letters from grateful tenants and always knew I was helping them as they were helping me. I almost never raised my rents unless there was a vacancy and I had to put $5-8k into the repair and fix up of the unit, and then it would go up a small amount. I liked my rents low because I had more people interested in renting from me and I could pick
someone who planned to stay awhile, and save me the labor or the deep cleaning and painting that
is very expensive. Nothing went wrong unless the person broke the lease or had difficult
circumstances. I had many tenants lose jobs and I kept them on and tried to work with them to keep
their apartment. I have lost well over $20k dollars in uncollected rents from people who couldn’t
manage but who I tried to work with. When you are a small time landlord and you do it yourself, and
you don’t want to lose your tenants. I also never raised my rents because I knew that if I have huge
repairs due to earthquake or roof damage I could raise the rents when I absolutely needed to.
Otherwise I chose to have tenants who appreciated me for the decent place and reasonable rent I
offered them. This is the typical story of the small time landlord. And I have seen some of them go
out of business because it is so much work and so hard to pull off. Many large and expensive repairs
are not accurately anticipated. An occasional difficult tenant can make you lose your good tenants,
cause expensive damage to your building and involve you in incredibly expensive legal procedures.
There is no help or money for you when that happens. I tried to represent myself in a clear legal
proceeding against a tenant who I accepted even though he was below my normal standards but it
was near the holidays and no one else was applying. He spoke well and I decided to give him a try
rather than lose 3 more months of rent. He ended up abusing his partner, disturbing and scaring the
other tenants, keeping a vicious dog, not cleaning up after the dog, and not paying rent. It was such
a simple case of none payment of rent that I tried to file with the court on my own behalf. I was not
able to do it without professional legal counsel because the paperwork was so arcane and required
to be filled out in a manner that was not readable or understandable by a layperson. These are the
difficulties of a small time landlord.

I recommend that you should never initiate new and permanent laws without counsel from people
who are in the field, and in your constituency because outside activists were speaking at the last El
Cerrito council meetings and they do not have our best interests at heart. Please leave your political
ambitions behind. Think fresh. Be the city to take a new and innovative approach. The actions you
are looking at will change our city forever. It will drive away the small time landlord and make for
fewer and more expensive apartments. The tenant activists know that SOME tenants will hit the
lottery and have more rights than the property’s owners. But it is adversarial, and not led by fairness.
My previous residence is an example of this.

I held on to my previous home, a 4 unit property in Berkeley, because my sons wanted to be able to
move into the place they were raised in and be in the neighborhood of their friends. I only left
because one son had a brain tumor and the extreme radiation he went through made him too sick to
live near the roads and hence auto exhaust we were close to. Now that he is better and older it
would be the perfect place for him to live. He works one block from there but there is no way that
we have enough money to buyout the tenants who are there so that my disabled son can live there.
In my four-unit property in Berkeley the only people who are being helped are not people who
particularly need help. They are each one of them better off than my son who will always have limits
and health issues and not by any means considered low income or needy other than the way we all
feel needy these days. I have seen this in friends who rent and who are sharing the apartments in
their building with lawyers and professionals and well off middle class kids who are just intelligently
letting these laws save them a lot of money so they can add to their retirement or nest egg. It makes
the neighborhoods more white, more traditional and less friendly to people who need support. It
chooses the tenant over the landlord regardless of the circumstance. It absolutely punishes small
time landlords who did not watch the laws change and get out of their family home or older
property that are the only properties affected by rent control. The measures are too unfair to be
applied to newer buildings. They are too unfair to apply to El Cerrito.

Respectfully,
Patricia Wilson, [REDACTED], El Cerrito

Subject: The Wrong Remedy

Dear Mayor Pardue-Okimoto and Members of the City Council,

I do not support just cause eviction, tenant relocation payments initiated by rent triggers, and the rent registry. Instead, I urge you to find solutions that can accommodate both housing providers as well as tenants. These are a prelude to the establishment of rent control and a rent board which will be too expansive for El Cerrito to sustain. As you know Richmond has already hired 8 full time staffers and the SF Rent Board hires 65 - 75 people. They also make landlords pay for this!

At the February 19th meeting, I along with my parents and over 100 of my fellow responsible housing providers expressed our opposition to these proposals because of the following:

1. **Just Cause Eviction** will lead to selectiveness in the rental market and overall wariness of mom and pop landlords. We are over 80% of housing providers in the city.
2. **Rent Registry** will be very costly and the city is not equipped to operate this program.
3. **Tenant Relocation Fees** is a form of rent control which has been proven to be the wrong solution to the housing crisis.

We ask that you reconsider these proposals and gather more data instead. More data will allow our community to evaluate whether El Cerrito needs these regulations.

I would suggest making it easier to add ADUs (Additional Dwelling Units) to a house or apartment building. I tried doing this to my building last year I worked with Sean Moss from city planning I was not able to get a permit due to “open space” requirements, even though I had a patio for each unit….I still didn’t have enough open space. If you streamline this process as San Francisco did, you have have more supply which will ease the housing shortage.
Thank you for your consideration.

Sincerely,

Al Wong

Based on City of El Cerrito Operating Revenues, 22% - 26% of the Revenues is from Property Taxes and Local Parcel Taxes (FY2015-16 to FY2019-20). 0% of Revenues is from Tenants.

There is no reason for City of El Cerrito to use Property owners and Home owners's Money to implement policies (Just Cause Eviction, Rent Control), and other punitive regulations against local property owners.
City of El Cerrito, CA
Adopted Biennial Budget
Fiscal Years 2018-19 and 2019-20

10890 San Pablo Avenue El Cerrito CA 94530  *  www.el-cerrito.org
ADOPTED BIENNIAL BUDGET FY 2018-19 AND FY 2019-20 OVERVIEW

The Fiscal Year 2018-19 and 2019-20 Adopted Biennial Budget provides funding for all City services and more, including Police, Fire, Recreation, Community Development, Public Works, Building, Planning, Environmental and City Management services. Although the City's primary operating fund, the General Fund, is in balance, a much larger surplus would be desirable to further increase reserves and protect the City against future economic declines and unforeseen emergencies. While staffing has remained flat, the number of new initiatives such as minimum wage, legalization of marijuana, smoking ordinance, inclusionary housing and other activities have continued to increase.

Our special fund revenues are sound and being used for their primary purposes rather than to backfill the General Fund as was necessary for a number of post-recessionary years.

Chart A below provides an overview of the City-wide revenues for next fiscal year:

Staff is projecting a steady increase in General Fund revenues the next two fiscal years.
March 2, 2019

Dear Mayor Pardue-Okimoto and City Council members,

On March 5th you will have the opportunity to discuss the important item of tenant protections. I ask that you draw from the information uncovered by your own city staff and that can be found in the Affordable Housing Strategy [http://www.el-cerrito.org/DocumentCenter/View/8637/Affordable-Housing-Strategy-Revised_08-31-2017](http://www.el-cerrito.org/DocumentCenter/View/8637/Affordable-Housing-Strategy-Revised_08-31-2017)

The Housing Element notes that many market-rate housing units in El Cerrito are unaffordable to extremely low-, very low-, and low- and moderate-income households. As of 2010, more than one-third all El Cerrito households were cost burdened, or spent more than 30 percent of their income for housing, and 17 percent spent more than 50 percent of their income on housing. Renters are more likely to be cost burdened than homeowners (Figure 3). This dynamic is likely to have worsened given recent housing price increases. The average asking rent for an apartment in El Cerrito increased by 39 percent between 2010 and 2017, to an average of $2,151 in June 2017, although no new units came onto the market during this time period (Figure 4).

On December 18th, 2018, the Human Relations Commission issued a recommendation to the city council including the following facts:

**The majority of El Cerrito renters spend more than 35% of their household income on rent**
- Research has found that those who spend more than 35% of their household income on rent are twice as likely to be hospitalized for hypertension and twice as likely to be hospitalized for mental illness
- Research has found that those who spend more than 35% of their household income on rent are twice as likely to be hospitalized for hypertension and twice as likely to be hospitalized for mental illness
- Research has found that one of the most effective ways to increase public health is to increase housing quality and decrease housing insecurity because of how directly housing insecurity has been found to impact physical and mental health

Based on these facts, you have at hand the opportunity to improve the lives of the renters in El Cerrito.

One thing that the responsible landlords and renters agree on – no one wants bad landlord practices in El Cerrito. Fair renter protections will not affect the good landlords who are already trying to avoid rent gouging and are treating their tenants fairly.

It is possible to protect landlord investments AND protect the health and diversity of our city and vulnerable tenants.

The El Cerrito Human Relations Commission sent you recommendations that have been not been fully examined by the city council. Their recommendations include:

1. Immediately establish “Just Cause Eviction” policies specifically detailing the only circumstances under which a landlord may evict a tenant; and
2. Immediately establish a temporary measure limiting rent increases to be within a certain percentage to protect tenants from rent gouging, which will be in place pending the adoption of rent control ordinances; and
3. Immediately establish a permanent citizen board or commission equally represented by citizen renters, landlords, and homeowners to advise the City Council on matters of housing; and
4. Immediately establish a citizen-led task force (separate from the above-described board or commission) specific to the topic of tenant protections to be in existence for the full duration of the time period in which the City Council and City Staff is researching, developing, and implementing the Affordable Housing
Strategy, to work alongside the City of El Cerrito to provide a direct and consistent access point for citizen input and advisory on matters of tenants' rights and protections; and
5. The above actions are to be utilized by the City Council as a means of information, education, and advisory regarding the full scope and impact of housing as a basic human right, with data and feedback to be collected and considered by the City Council at six month increments.

(See for full HRC Resolution on Tenant Protections) https://www.el-cerrito.org/ArchiveCenter/ViewFile/Item/4663

The recommendations above are in the mainstream with many of the proposals now being contemplated by regional organizations and the State of California.

Regionally, CASA -The Committee to House the Bay Area, published their CASA Compact, a series of recommendations derived from discussions of various stakeholders. https://mtc.ca.gov/sites/default/files/CASA_Compact.pdf

Recommendations included:
- Just Cause Eviction
- Rent Cap
- Rent Assistance and Access to Legal Counsel

The State of California is contemplating measures to address the housing crisis as well. One possible measure on the table follow could model the recently passed anti-rent gouging bill passed in Oregon. https://www.kqed.org/news/11728558/if-california-pursues-a-cap-on-rent-increases-how-many-tenants-will-it-actually-help

The anti-rent gouging language is similar to the CASA rent cap proposal and similar to a UC Berkeley report: Finding Common Ground on Rent Control, released last year after meeting with both landlord and tenant groups. https://tenercenter.berkeley.edu/finding-common-ground-rent-control

As elected officials, please remember that a majority of El Cerrito voted FOR Proposition 10 in November 2018.

Please move forward now: Place the HRC Resolution on the agenda for your March 5th meeting and discuss their recommendations. Take action and adopt a temporary anti-rent gouging measure ordinance and just cause eviction ordinance. Convene community members to review specifics for a long term solution.

Very sincerely yours,

Tomi Nagai-Rothe
RENT CONTROL PASSED IN OREGON. WILL IT WORK AS A HOUSING-CRISIS SOLUTION NATIONWIDE?

PACIFIC STANDARD 3/5/19

If rent-control measures pass in all of the states and cities where they're currently on the table, nearly a third of all renter households in the United States could secure relief.

SOPHIE KASAKOVE
10 HOURS AGO

For the first time in decades, rent control is under serious consideration by lawmakers across the country. According to a report https://www.jchs.harvard.edu/sites/default/files/harvard_jchs_americas_rental_housing_2017.pdf published last week by advocacy groups Center for Popular Democracy, Right To The City Alliance, and PolicyLink, if rent-control measures pass in all of the states and cities where they're currently on the table, nearly a third of all renter households in the United States could secure relief from the worst of the housing crisis.

Currently, only four states in the country have rent-controlled units anywhere within their bounds (California, Maryland, New York, and New Jersey—in addition to Washington, D.C.). Thirty-seven have laws actively prohibiting or preempting localities from enacting it. This wasn't always the case: Responding to mounting real-estate industry pushback, many states adopted such legislation in the 1980s and '90s, driving the expansion of rent control to a halt. But as rising housing prices continue to send an increasing number of families into
instability, poverty, and homelessness, and as nearly half of all renters in the U.S. meet the government's standard of cost-burdened according to the Joint Center for Housing Studies at Harvard University, states and cities are once again looking to the policy as the most effective short-term solution to the crisis.

Rent-control advocates across the country are clear that the policy is not the only solution to the housing crisis, nor necessarily the most effective: Locking in rents that are already severely unaffordable may not provide housing security for the lowest-income renters. But the report argues that it is the most efficient affordable housing solution.

In cities where it exists already, rent control is the largest source of affordable housing, the report shows. In San Francisco, rent control stabilizes 173,000 units, three times more than all other affordable housing combined. In New York City, twice as many low-income families live in rent-regulated apartments than in public and subsidized housing.

There's evidence from the U.S.'s first major rent control experiment of the policy's ability to provide affordable housing quickly in times of crisis. In the years after Santa Monica, California, adopted rent stabilization in 1979, the proportion of tenants living for more than five years in the same units doubled, while gentrification slowed and the exodus of lower income households and families with children halted.

Rent control has also been, historically, the cheapest option to provide affordable housing: in 2013, Berkeley stabilized 19,000 units for only $4 million, compared with the $20 million it would have cost to provide vouchers to the city's 2,200 lowest-income renter households, or the $220 million it would have cost to build or rehabilitate 2,200 affordable units. With the Department of Housing and Urban Development crippled by budget cuts, quicker, cheaper fixes are an increasingly crucial stopgap.

"In the face of our renter crisis, we need immediate solutions with immediate benefits for low-income renters facing this crisis of affordability, stability, displacement, eviction," says Sarah Treuhaft, one of the authors of the report and managing director of PolicyLink. "There's really no comparison [with rent control] in terms of the scale and breadth compared with other policies."

Rent control promises to be particularly effective for the country's most vulnerable renters: Out of the 12.7 million households that would be stabilized if rent control passes in the places currently considering it, 75% are
low- or moderate- income. It would also disproportionately benefit Black and Latino renters, who are more likely to be cost-burdened than white renters.

The report systematically combats industry groups' arsenal of anti-rent control talking points. To the claim that rent control stunts housing development, it offers longitudinal studies of rent control in New Jersey where the policy had no impact on construction rates, and in Boston, where construction rates decreased for multifamily buildings after rent control was repealed. The argument that rent control causes rents to increase in non-regulated units has also been proven false: in Massachusetts (before the repeal), California, and New Jersey, rent control had no effect on non-regulated units prices, or even slightly increased affordability.

The national mood on rent control is shifting quickly, led by Oregon. Just last week, the state became the first in the country to adopt mandatory statewide rent control, limiting yearly rent increases to 7 percent and banning no-cause evictions. Across the state, median rent has increased rapidly in recent years, pushing the state into second place in the country for homelessness. One organizer with the Community Alliance of Tenants, a grassroots tenants advocacy group, Jesse Sharpe, saw the monthly rent on his two-bedroom apartment in Ashland jump three times in one year, for a more than 36 percent total increase. Sharpe soon learned that the largest property owner in southern Oregon had purchased his building, along with the other six apartment complexes on his street, and launched a massive rent hike on all of them.

Oregon's policy was resisted vigorously by the state's real estate lobby: A 2017 version of the bill died in the Senate after an industry group, More Housing Now!, spent $1 million to oppose it. But according to Pamela Phan, another organizer with CAT, the policy had gained increasing support as the renter crisis worsened. "We're two years deeper into a crisis that has so many more casualties than before. We've seen communities where it doesn't matter what party you're in—essentially, if you're a renter you have instability and insecurity," she says. "So, legislators are looking at the impacts and saying, 'We can't just call these externalities to the rental housing market anymore.'"

Even so, industry pushback did constrain the scope of the bill: The legislation establishes a rent-increase cap of 7 percent plus inflation, which could still allow for unaffordable rent increases. And, the law only applies to buildings at least 15 years old and kicks in after tenants have lived in their home for a year. Even so, according to the report, the policy will stabilize almost half a million of the state's 1.6 million renter households. Well over half of those who will benefit from the legislation are low-income, according to the report's estimates.
Rent-control efforts are being put to a vote elsewhere, too. Last week in Chicago, voters in four wards in the Northwest Side voted to eliminate Illinois' statewide ban on rent control, adding to the chorus of support demonstrated in two elections last year in other parts of the city. The report estimates that over 1.5 million renter households would be stabilized in Illinois if the state implemented rent control on a statewide basis, as one bill under consideration would entail.

There are also currently ongoing movements to introduce rent control in Colorado, Philadelphia, and Providence, Rhode Island, and to strengthen and expand rent control in California and New York.

"We're moving into a new era with a new social contract," says Phan, "in which tenants are going to be actually present in legislation."

The opinions expressed in America’s Rental Housing 2017 do not necessarily represent the views of Harvard University, the Policy Advisory Board of the Joint Center for Housing Studies or the MacArthur Foundation.
After a decade of broad-based growth, renter households are increasingly likely to have higher incomes, be older, and have children. The market has responded to this shift in demand with an expanded supply of high-end apartments and single-family homes, but with little new housing affordable to low- and moderate-income renters. As a result, part of the new normal emerging in the rental market is that nearly half of renter households are cost burdened. Addressing this affordability challenge thus requires not only the expansion of subsidies for the nation's lowest-income households, but also the fostering of private development of moderately priced housing.

RENTER HOUSEHOLD GROWTH IN A SLOWDOWN

Rental housing markets have seen an unprecedented run-up in demand over the last decade, with growth in renter households averaging just under one million annually since 2010. But the surge in demand now appears to be ending, with the three major government surveys reporting a sharp slowdown in renter household growth to the 136,000-625,000 range in 2016. Early indications for 2017 suggest a further deceleration, with one survey showing essentially no increase and another posting a substantial decline (Figure 1). While these estimates are notoriously volatile from year to year, the consistent trend across surveys provides some confidence that growth in renter households is indeed cooling.

The recent wave in renter household growth reflects in part the sharp drop in the national homeownership rate after 2004. While many factors drove that decline, the massive wave of foreclosures after the housing crash was a key contributor. This drag on homeownership has now eased. And with the economy near full employment and incomes on the rise, more households that want to buy homes are able to do so. Still, the housing crisis no doubt generated renewed appreciation for the advantages of renting that will help sustain demand in the years ahead. Indeed, even as the homeownership rate stabilizes, renters are still likely to account for slightly more than a third of household growth. According to Joint Center projections, the number of renter households will increase by nearly 500,000 annually over the ten years from 2015 to 2025—a still robust pace by historical standards.

The sweeping changes in the nature of rental demand, however, seem likely to persist. In particular, renting now appears to have greater appeal for households that could afford to buy homes if they desired. In 2006, 12 percent of households earning $100,000 or more were renters. In 2016, that share exceeded 18 percent, a cumulative increase of 2.9 million renters in this top income category. Indeed, these high-income households drove nearly 30 percent of the growth in renters over the decade. Even so, renting remains the primary housing option for those with the least means. A majority (53 percent) of households earning less than $35,000 rent their housing, including over 60 percent of households earning less than $15,000.
After a Decade of Expansion, the Pace of Growth in Renter Households Has Slowed

In addition, renters are now much older on average than a decade ago, reflecting both an increase in middle-aged households that rent and the overall aging of the population. The median age of renters thus increased from 38 in 2006 to 40 in 2016. Although roughly a third of renters are under age 35, nearly as many are now age 50 and over.

With renting more common across age and income groups, renter households are more representative of the broad cross-section of US families. Most notably, families with children now make up a larger share of households that rent (33 percent) than own (30 percent). Married couples without children, in contrast, make up 37 percent of homeowners and just 12 percent of renter households. Single persons are still the most common renter household type, accounting for fully 37 percent of all renter households.

While whites accounted for a large share of the overall growth in renters, renter households are quite racially and ethnically diverse. Unlike homeowners, who are overwhelmingly white, renter households include a large share (47 percent) of minorities. At the same time, one in five renter households is foreign born, reflecting the importance of rental housing to new immigrants.

**E Volution of the Rental Supply**

Soaring demand sparked a sharp expansion of the rental stock over the past decade. Initially, most of the additions to supply came from conversions of formerly owner-occupied units, particularly single-family homes, which provided housing for the increasing number of families with children in the rental market. Between 2006 and 2016, the number of single-family homes available for rent increased by nearly 4 million, lifting the total to 18.2 million. While single-family homes have always accounted for a large share of rental housing, they now make up 39 percent of the stock.

More recently, though, growth in the single-family supply has slowed. The American Community Survey shows that the number of single-family rentals (including detached, attached, and mobile homes) increased by only 74,000 units between 2015 and 2016, substantially below the 400,000 annual increase averaged in 2005-2015. With this slowdown in single-family conversions and a boom in multifamily construction, new multifamily units have come to account for a growing share of new rentals. Indeed, completions of new multifamily units intended for rent averaged 300,000 annually over the last two years, their highest level since the end of the 1980s.

Much of this new housing is targeted to higher-income households and located primarily in high-rise buildings in downtown neighborhoods. Given that construction and land costs are particularly high in these locations, the median asking rent for new apartments increased by 27 percent between 2011 and 2016 in real terms, to $1,480. Using the 30-percent-of-income standard for affordability, households would need an income of at least $59,000 to afford these new units, well above the median renter income of $37,300.

At the same time, the supply of moderate- and lower-cost units has increased only modestly (Figure 2). While the share of new units renting for at least $1,100 jumped from 37 percent in 2001 to 65 percent in 2016, the share renting for under $850 shrank from just over two-fifths to under one-fifth. The lack of new, more affordable rentals is in part a consequence of sharply rising construction costs, includ-

Monthly Housing Cost
- Under $650
- $650–849
- $850–1,099
- $1,100–1,499
- $1,500 and Over

Notes: Recently built units in 2001 (2016) were constructed in 1999–2001 (2014–2016). Monthly housing costs include rent and utilities and are in constant 2016 dollars, adjusted for inflation using the CPI-U for All Items Less Shelter. Data exclude units that are for sale or for which no cash rent is paid.

In many cases, the supply of these so-called naturally occurring affordable rentals is replenished as rents on older housing fall due to aging and obsolescence. But with overall rental demand strong, particularly in centrally located communities, rents for an increasing number of once-affordable units have become out of reach for lower-income households. At the same time, the rents charged for units in neighborhoods with weak demand may not support adequate maintenance, leaving those rentals at risk of deterioration and loss. Given the lack of new construction of lower-cost rentals, preserving the existing stock of privately owned affordable units is increasingly urgent.

RENTAL MARKETS AT A TURNING POINT
Rental construction led the housing recovery, rebounding nearly four-fold from the market trough in 2009 to 400,000 units in 2015—the highest annual level since the late 1980s. But after moving sideways in 2016, the pace of multifamily starts has fallen 9 percent through October 2017. The slowdown has occurred in markets across the country, but is most evident in metros where multifamily construction had been strongest.

In addition to the slowdown in construction, a variety of measures suggest that the rental boom is cresting. RealPage reports increasing slack in the professionally managed apartment market, with vacancy rates rising over the past year in 94 of the 100 metros tracked. The clearest signs of loosening are in the higher-priced Class A segment, where the vacancy rate was up 1.5 percentage points year over year in the third quarter of 2017, to 6.0 percent (Figure 3). Vacancy rates in the lower-cost Class C segment also rose but remain quite low at 4.1 percent.

Apartment rents are also increasing more slowly in all three segments of the market (Figure 4). This deceleration has appeared in all four regions of the country and in large and small markets alike. Even so, conditions in selected markets—particularly smaller metros and locations in the Midwest, such as Cincinnati and Minneapolis—were still heating up.

Over the last six years, increases in the median rent have exceeded inflation in non-housing costs by more than a full percentage point annually, with the largest gains in the South and West. Median rents have risen at twice the national pace in markets with rapid population growth, such as Austin, Denver, and Seattle. And within these fast-growing metros, rents in previously low-cost neighborhoods rose nearly a percentage point faster each year than in high-cost neighborhoods.

Meanwhile, rental property owners continue to benefit from still healthy increases in operating incomes and property values. According to the National Council of Real Estate Investment Fiduciaries,
operating incomes were up 3.8 percent in the third quarter of 2017 from a year earlier. In addition, Real Capital Analytics reports that real apartment prices climbed 6.3 percent in the second quarter of this year. Although declining, rates of return on investment remained relatively strong at 6.2 percent. The pace of investment, however, appears to be slowing, with the volume of large international and institutional deals falling in many major apartment markets.

Even so, multifamily financing remains at an all-time high. According to the Mortgage Bankers Association, the volume of outstanding multifamily mortgage debt increased by about 20 percent in 2015–2016, rising to nearly $1.2 trillion in early 2017. Federally backed debt rose by 25 percent, while bank and thrift lending was up 29 percent. Meanwhile, multifamily loan delinquencies are extremely low. Some caution appears to be creeping into the market, however, with the latest Federal Reserve loan officer surveys pointing to tightening credit and slowing demand.

SLIGHT EASING OF AFFORDABILITY PressURES
With the economy continuing to improve and income growth accelerating, the share of renters with cost burdens (paying more than 30 percent of income for housing) fell in 2016 for the fourth time in five years, to 47 percent (Figure 5). The number of cost-burdened renters also fell for the second consecutive year, declining from 21.3 million in 2014 to 20.8 million in 2016, with the number of severely burdened households (paying more than 50 percent of income for housing) dipping from 11.4 million to 11.0 million. However, this progress comes only after a decade of steep increases. At the average rate of improvement from 2014 to 2016, it would take another 24 years for the number of cost-burdened renters to return to the 2001 level.

The high incidence of cost burdens reflects the divergent paths of rental housing costs and household incomes. Between 2001 and 2011, median rental housing costs rose 5 percent in real terms while median renter incomes dropped 15 percent. Since 2011, however, real housing costs have increased 6 percent while income growth has picked up 16 percent (due in part to the increasing share of renters with higher incomes). But even with the recent turnaround in incomes, the cumulative increase in rental housing costs since 2001 has been far larger.

The rental market thus appears to be settling into a new normal where nearly half of renter households are cost burdened. An important element of this trend is that more middle-income renters are spending a disproportionate share of income for housing. Indeed, the share of renters earning $30,000–45,000 with cost burdens jumped from 37 percent in 2001 to 50 percent in 2016, and the share earning $45,000–75,000 nearly doubled from 12 percent to 23 percent. In addition, the cost-burdened share of lowest-income households (earning less than $15,000) was still a stunning 83 percent, with the vast majority experiencing severe burdens.

Given the fundamental need for shelter, rent is typically the first bill paid each month. High housing costs erode renters’ purchasing power, leaving little money left over for other essentials such as food, childcare, and healthcare. In 2016, the median renter in the bottom...
income quartile had just $488 per month to spend on other essentials—18 percent less than in 2001 after adjusting for inflation. The added costs of utilities and transportation further strain household budgets. Low-income households with children and older adults with severe rental cost burdens are in a particularly precarious position and may be unable to afford other goods and services that are critical to health and well-being.

SHORTFALL IN RENTAL ASSISTANCE

Need for housing assistance continues to grow. HUD's Worst Case Housing Needs 2017 Report to Congress shows that the number of very low-income households receiving rental assistance increased by 600,000 from 2001 to 2015. Over the same period, the number of very low-income households (making less than 50 percent of area median) grew by 4.3 million, with extremely low-income households (making less than 30 percent of area median) accounting for more than half (2.6 million) of this increase. As a result, the share of renters potentially eligible for assistance and that were able to secure this support declined from 28 percent to 25 percent (Figure 6). Meanwhile, the share of very low-income renters facing worst case needs—that is, paying more than half their incomes for housing and/or living in severely inadequate units—increased from 34 percent to 43 percent.

Making matters worse, much of the subsidized rental stock is at risk of loss either due to under-maintenance or expiring affordability periods. Public housing is particularly under threat, with a backlog of deferred repairs last estimated at $26 billion in 2010. In fact, the number of occupied public housing units fell by 60,000 between 2006 and 2016. The Rental Assistance Demonstration (RAD) program was launched in 2012 to convert public housing into long-term project-based Section 8 contracts in order to provide more flexible financing for improvements. The RAD program quickly reached its initial cap of 60,000 units, which has since been increased to 225,000 units.

The two main sources of rental housing assistance are the Housing Choice Voucher and Low Income Housing Tax Credit (LIHTC) programs. Vouchers enable recipients to choose units on the open market as long as they meet rent and quality standards. Despite a 6.8 percent increase in funding between 2011 and 2016, rising rents kept growth in the number of voucher holders to just 5.8 percent.

In contrast, the LIHTC program provides funding for new construction as well as rehabilitation and preservation of existing assisted housing. In recent years, the LIHTC program has supported 70,000 affordable rental units per year, with roughly 55 percent added through new construction. But over the next decade, nearly 500,000 LIHTC units, along with over 650,000 other subsidized rentals, will come to the end of their required affordability periods. The need for funding to help rehabilitate and preserve this important stock will fuel significant demand for LIHTC funding, thus limiting opportunities to build new affordable rentals.

In recognition of the important role that the LIHTC program plays, the Congress is considering a bipartisan proposal to expand funding while also introducing reforms that would improve the ability of the program to serve both lower- and moderate-income households.

![Figure 6: Despite Recent Declines, the Number and Share of Cost-Burdened Renters Remain Well Above Levels a Decade Ago](image-url)
The incidence and severity of natural disasters is on the rise. In developing their recovery plans to improve resiliency after such events, governments at all levels must keep in mind the needs of renters—particularly very low-income renters—for replacement housing.

THE OUTLOOK
Slower growth in rental housing demand could be good news if it helps to check the rapid rise in rents. But even if the homeownership rate stabilizes near current levels, the number of renter households is likely to continue to increase at a healthy clip, driving up the need for additional supply. And given that a broader array of households has turned to renting, this also means a growing need for a range of rental housing options.

With the divergence between housing costs and household incomes after 2001, cost burdens are a fact of life for nearly half of all renters. The lack of affordable rental housing is a consequence of not only strong growth in the number of lower-income households, but also steeply rising development costs. The complex set of forces driving these increases includes the escalating costs of inputs and a lack of innovation in production methods, the design of homes, and the means of financing housing. Addressing all of these challenges requires action on the parts of both the public and private sectors. Government at all levels has a role to play in ensuring that the regulatory environment does not stifle much-needed innovation, and that tax policy and public spending support the efficient provision of moderately priced housing. Industry has its own part to play in fostering and advancing new approaches.

However, the market simply cannot supply housing at prices affordable to the nation’s lowest-income households. The best means of supporting these families and individuals depends on both local market conditions and the value placed on other policy goals, such as helping to revitalize communities and improving the geographic distribution of permanently affordable housing. Another consideration for policymakers is to find ways for housing assistance programs to enable and encourage economic mobility.

While there is much to debate about the best approaches to pursue, the current level of rental housing assistance is grossly inadequate. It is concerning that discussions about federal tax reform have not addressed ways to expand the availability of affordable housing, and proposed measures could even erode the limited support that currently exists. As a growing body of evidence shows, the costs that poor-quality, unstable housing situations impose on individuals and families—as well as on broader society in terms of lost productivity and the strain on public budgets—are simply too high to ignore.
More than a third of US households live in rental housing. After the Great Recession and housing market crash, the number of renters surged across all ages, races/ethnicities, and household types, with especially large increases among higher-income and older households. Nevertheless, younger, lower-income, and minority households are still the most likely to rent and thus make up large shares of renters. While growth in rental demand now appears to be slowing, demographic changes will continue to drive strong increases in the number of renter households over the coming decades.

A DECADE OF SOARING DEMAND COMING TO AN END

Rental housing demand has grown at an unprecedented pace for more than a decade. According to the Census Bureau's Housing Vacancy Survey, the number of renter households jumped by nearly a third, or roughly 10 million, between the homeownership peak in 2004 and 2016. From 2010 through 2016, growth has averaged 976,000 renters per year, far exceeding the 430,000-500,000 added annually in the 1970s and 1980s when the baby boomers started to enter the rental market. As of mid-2017, the number of US renters stood at 43 million.

The surge in renter households erased a decade of declining demand between 1994 and 2004, when the national rentership rate fell from 36 percent to just 31 percent (Figure 7). The share of renter households was back up above 36 percent by early 2015, where it has stabilized now that fewer owners are losing their homes to foreclosure and more young households are buying first homes. As a result, rental markets generally are drawing less demand from homeowner markets.

The latest survey data are beginning to reflect these trends. All of three annual Census Bureau household surveys reported slowdowns in renter growth in 2016. Indeed, the Housing Vacancy Survey showed a year-over-year decline in the number of renter households in mid-2017. But given that the trend is new and survey data are unprecise, the full extent and duration of the decline in rental demand are still unclear. Assuming that the homeownership rate does stabilize, renters should continue to account for roughly a third of household growth in the years ahead.

THE SURGE IN HIGH-INCOME RENTERS

Households of all ages, incomes, races/ethnicities, and family types helped to fuel the recent growth in renters, but the role of high-income households is particularly noteworthy. According to the Current Population Survey, households with real annual incomes of $50,000 or more—a group that accounted for just one-third of all renter households in 2006—drove well over half (60 percent) of the growth in renter households from 2006 to 2016. Moreover, house-

holds with real annual incomes of $100,000 or more—making up just 9 percent of renters in 2006—were responsible for 29 percent of the 9.9 million increase in renters over the decade (Figure 8).

Many, though not all, of the outsized increases in higher-income renters were concentrated in high-cost metro areas. For example, households earning $100,000 or more accounted for 65 percent of the growth in renter households in the New York City metro and fully 93 percent in San Francisco (Figure 9). But even in metros where they were less prevalent, higher-income households were responsible for significant shares of renter growth, including Miami (15 percent) and Phoenix (20 percent).

Strong growth in high-income renter households was driven in large measure by sharply higher rentership rates among this group. Indeed, the share of households with incomes of at least $75,000 that rented their housing jumped by 6.9 percentage points in 2006-2016, more than twice the 3.3 percentage point increase among households earning less than $50,000. Without this increase in rentership rates among high-income households, there would be 3.4 million fewer renters today.

The strong growth in higher-income households altered the distribution of renter household types. Unlike lower-income renters, who primarily live in single-person households, higher-income renters live in a variety of household settings that are likely to include multiple adults, such as married couples or unmarried partners. These types of households, which are apt to have at least two earners, made up half of the growth in renters earning $50,000 or more over the past decade.

### Roles of Older and White Households

While the largest increase in rentership rates was among young, high-income households, much of the overall growth in renter households was driven by older households. Indeed, adults age 50 and over accounted for half of the increase in the total number of renters in 2006-2016 (Figure 10). Although much of this increase simply reflects changes in the age structure of the population, rising rentership rates among this age group lifted the number of older renters well above what population aging alone would suggest. In addition, higher rentership rates among households in their 30s and 40s also helped to offset what would have otherwise been declines among that age group as the youngest baby-boomers moved into their 50s.

Given that older adults are likely to live alone, the increase in older renters added significantly to the number of single-person households. Single persons accounted for 37 percent of renter household growth overall in 2006-2016, but fully 52 percent of the growth in renter households age 50 and over. By comparison, single persons made up only 20 percent of the increase in renter households under age 50. As a result, three out of every four single-person renter households added over the decade were at least age 50.

After single persons, married couples without children accounted for the next-largest share of renter growth (17 percent). This group includes older renter households with adult children no longer living at home. Running a distant third, married couples with children made up just 10 percent of the growth in renter households.

A resurgence of renting among white households also helped to keep demand on the rise. The number of renter households headed by a

white person was up by 3.6 million in 2006–2016, more than offsetting the 2.6 million decline that had occurred over the previous 20 years. While minority renters collectively drove most of the increase in renter households over the decade, white households were responsible for the largest share of growth (37 percent), followed by Hispanics (27 percent), blacks (21 percent), and Asians/others (15 percent). The majority of the increase in white renters (65 percent) was among households age 50 and over, but younger households—particularly those in the 25–34 year-old age group—also contributed significantly to growth.

PROFILE OF RENTER HOUSEHOLDS
Despite the changing composition of renter household growth over the past decade, households that rent their housing differ in systematic ways from those that own homes (Figure 11). In particular, renters tend to be younger, with a median age of 40 in 2016 compared with 56 for homeowners. Rentership rates decline with age, dropping from more than two-thirds (68 percent) of households under age 35 to less than a quarter (24 percent) of households age 55 and over. Nevertheless, the overall aging of the population has meant that one in three renters is now over the age of 50.

Although the majority of renter households are white, the minority share of renters (47 percent) is twice that of homeowners. As measured by the Current Population Survey, rentership rates of Hispanic, black, and all other minority households are higher than for whites both overall and across age groups. Renters are also more apt to be foreign born than homeowners, with immigrants accounting for 20 percent of renters but just 12 percent of owners.

Renter households are smaller on average than owner households. Over a third of renter households (37 percent) are single persons living alone—far higher than the 23 percent share among owners. Still, families make up a significant share of renter households, and families with children in fact account for a larger share of renter households (33 percent) than homeowner households (30 percent) in the 2016 ACS.

Household incomes for renters are lower than for owners. According to the American Community Survey, the median income for cash renters in 2016 was $37,300—more than 49 percent below the median income of owners of $73,100. In addition, two-thirds of all renter households (30.5 million) were in the bottom half of the income distribution (below the US median household income). As measured by HUD's Worst Case Housing Needs 2017 Report to Congress, 64 percent of renters had low incomes (80 percent or less of area medians) and 26 percent had extremely low incomes (30 percent or less of area medians).

In addition to their lower incomes, renter households have very little savings and wealth. The latest Survey of Consumer Finances indicates that the median net worth of renter households was only $5,000 in 2016, a small fraction of the median owner's net worth of

$230,000. The median amount of cash savings held by renters was similarly low at just $800, compared with $7,300 for owners.

The discrepancy in wealth is even greater among households headed by adults age 65 and over, who generally need to draw down their assets in retirement. The median net wealth of older renters was $6,700 in 2016, compared with a median for older homeowners of $319,200. Not all of this difference is due to housing wealth, however. The non-housing wealth of renters in all age groups is also several times lower than that of homeowners.

**The Geography of Renting**

The 2016 American Community Survey indicates that just under half (46 percent) of all renter households reside in principal cities of metropolitan areas. By comparison, about a quarter (26 percent) of homeowner households live in these locations.

Among the nation's 100 largest metro areas, the highest rentership rates are in high-cost markets such as Los Angeles (52 percent) and New York City (49 percent), as well as in fast-growing areas such as Las Vegas (49 percent) and Austin (42 percent). The shares of renters are much smaller in low-cost and slow-growth areas like Detroit (32 percent), Grand Rapids (29 percent), and Pittsburgh (31 percent). Rentership rates are also relatively low in metros with large shares of older householders, such as Cape Coral, Deltona, and several other Florida metros, consistent with the high homeownership rates among this age group.

Higher-income households are more apt to rent in high-cost housing markets (Figure 12). This makes the renter population in these areas somewhat more economically diverse than the US average. However, these metros still have large numbers of low-income renters and the highest rates of renting among low-income households.

Given their greater income diversity, renters in high-cost metros are also more diverse in terms of household type. Nearly half (45 percent) of all married couples with children that live in Los Angeles and San Diego rent their housing. By comparison, the share of married couples with children that rent is just 15 percent in Pittsburgh and 18 percent in Philadelphia. At the same time, high-cost markets tend to have larger shares of nontraditional households, which may include extra workers to help afford the high rents. For example, households with three or more adults made up 13 percent of renter households nationally in 2015, but 23 percent in the Los Angeles metro area.

**Renting Through the Lifecycle**

The vast majority of households rent at some point in their lives. According to a JCHS analysis of the Panel Study of Income Dynamics (PSID), about half (49 percent) of owners under age 60 in 2015 had been renters at some point within the previous 20 years. Among owners under age 50, the share was even higher at nearly three-quarters (72 percent).
Over the Next Ten Years, Aging of the Baby Boomers and Millennials Will Drive Growth in Renter Households

Without the downpayment and other costs entailed in buying and selling homes, renting is often an affordable housing option for young adults. Indeed, the 2015 American Housing Survey shows that 86 percent of all newly formed households were renters. Low transaction costs also make renting a good choice for households that move frequently. As measured by the Current Population Survey, renters accounted for three out of four residential moves in 2016, as well as for the majority of moves made by all age groups.

But renting is not merely a life phase or a steppingstone to homeownership for all households. The JCHS analysis of PSID data also indicated that 17 percent of renters in 1995 remained renters through 2015. In addition, 23 percent of homeowners in 1995 switched to renting sometime in the ensuing two decades, often in response to changes in family structure and other life events. For instance, renters made up over 80 percent of recent movers who were divorced or separated. Other owners shifted to renting to have less responsibility for home maintenance. This preference, along with the desire to downsize or to meet accessibility needs, is reflected in the increasing shares of renters among the oldest age groups. PSID data indicate that 1 in 12 owners age 55–64, 1 in 8 owners age 65–74, and 1 in 5 owners age 75 and over made own-to-rent transitions between 2005 and 2015.

The Outlook

Given the sharp swings in rentership rates over the past two decades, predicting future rental demand is difficult. Shifting preferences, macroeconomic conditions and government policy help to shape many of the factors that determine rates of renting and owning, including housing affordability, mortgage accessibility, labor markets, and household incomes. As a starting point, though, future rental demand depends on the rate of household growth. JCHS projections suggest that overall household growth will be strong over the next 10 years as increasing numbers of the large millennial generation reach adulthood (Figure 13). At the same time, the aging of the baby-boom generation will lift the number of older households. Household growth is therefore expected to total 13.6 million in 2015–2025, before moderating to 11.5 million in 2025–2035 when losses of older households begin to accelerate.

Despite the aging of the adult population (which tends to favor higher homeownership rates), certain other demographic forces should support healthy growth in rental demand. Over the next 10 years, the younger half of the millennial generation—the largest generation in US history—will move into their 20s and 30s, the age groups most likely to rent. In addition, minority households are expected to account for nearly three-quarters of household growth in 2015–2025 and fully 90 percent in 2025–2035. If minority homeownership rates remain at current levels, the national rentership rate will increase in the coming decades.

Taking all of these forces into account, the base scenario from the 2015 JCHS household tenure projections shows that, if homeownership rates stabilize at their 2015 levels, underlying demographics—that is, growth and change in the composition of US households by age, race/ethnicity, and family type—will support the addition of 4.7 million renters and 8.9 million homeowners between 2015 and 2025.
The nation's rental housing comes in all structure types, sizes, prices, and locations. But with the recent growth in high-income renter households, most additions to the stock have been at the upper end of the market. In contrast, the supply of rentals affordable to low- and moderate-income households has not kept pace with growth in demand, contributing to the spread of housing cost burdens. At the same time, the rising costs of land, materials, and construction make development of lower-rent units increasingly difficult.

SNAPSHOT OF THE RENTAL STOCK
JCHS analysis of the 2016 American Community Survey indicates that the rental stock comprises 47.1 million units, or 35 percent of the national housing supply. Just under 44 million of these units are currently occupied. Of the 3.4 million units that are vacant, 82 percent are available for rent while the remaining 18 percent are rented but unoccupied.

It is a common misconception that rental housing consists almost entirely of apartments in multifamily buildings. In fact, multifamily units account for 61 percent (28.9 million units) of the nation’s rental stock, distributed across various-sized properties. Single-family homes make up a substantial—and, until recently, fast-growing—share of rentals (Figure 14). This stock includes 13.1 million detached homes, 2.9 million attached homes, and 2.1 million mobile homes, RVs, and similar dwellings.

Nearly half (46 percent) of all renter-occupied units are located in the principal cities of metro areas, 42 percent in surrounding suburban communities, and the remaining 12 percent in non-metro areas. Types of rental housing vary substantially by location, with large apartment buildings of at least 20 units concentrated in urban areas and single-family rentals found primarily in suburban and non-metro areas.

GEOGRAPHIC VARIATION IN SUPPLY
In the nation’s 100 largest metros (home to almost 70 percent of all US households), detached single-family homes make up 24 percent of the rental stock while attached single-family units add another 7 percent. The remaining units are in multifamily structures, with 17 percent in small buildings of 2-4 units, 24 percent in mid-sized buildings of 5-19 units, and 25 percent in large buildings of 20 or more units. Mobile homes provide another 2 percent of the housing stock in the largest metros.

But given differences in topography, density of development, and average age of the stock, the mix of rental housing varies widely across metro and rural areas. For example, detached single-family

In rural areas (as defined by the US Census Bureau), the rental stock primarily consists of single-family homes. Indeed, almost three-quarters of rural rentals are single-family units. The highest concentrations of single-family rentals are in New Mexico (89 percent of the rural stock) and Oregon (86 percent). But even in states with the smallest shares (Massachusetts, New Hampshire, and Vermont), single-family homes still make up about half of rural rentals.

Mobile homes are also an important component of the rural rental stock, contributing fully 20 percent of rural rental housing nationwide. At the state level, however, mobile homes are much more common in the rural communities of South Carolina (39 percent of the stock) and North Carolina (36 percent) than in the rural areas of Hawaii (0.4 percent of the stock) and Massachusetts (2.0 percent).

Ownership of Rental Housing

Individual investors are the largest group of rental housing owners, followed by business entities such as limited partnerships (LPs), limited liability companies (LLCs), and limited liability partnerships (LLPs). Individual investors primarily own single-family rentals and small apartment properties, while LPs, LLCs, and LLPs own a majority of large apartment properties. As a result, individuals own three-quarters of rental properties (74 percent) but just under half of the nation’s rental units (48 percent), while business entities own 15 percent of rental properties but a third of units (Figure 15). Housing cooperatives and nonprofit organizations own 2 percent of rental properties and 4 percent of rental units, while real estate corporations and investment trusts own 1 percent of rental properties and 5 percent of rental units. The remaining 8 percent of properties and 10 percent of units are under other forms of ownership, such as trustee for estate, tenant in common, and general partnership.

The latest Rental Housing Finance Survey reports that the single-family ownership share of individual investors slipped from 83 per-
cent in 2001 to 76 percent in 2015 as institutional investors gained a foothold in the market. But this decline in individual ownership likely overstates institutional investment in single-family rentals. Indeed, real estate corporations and investment trusts owned only 250,000 single-family rentals in 2015. In addition, many individual investors reportedly transferred ownership of their properties to LLCs in recent decades to protect against legal problems and to take advantage of tax benefits.

Along with shifting patterns of ownership, motivations for acquiring single-family rental units may have also changed. While there is little research available on this topic, one study suggests that prior to the housing market crash, the two major reasons that owners bought single-family rentals were as primary residences, which they then decided to rent, or as income-generating investments. However, the housing boom and bust encouraged more speculation in the single-family rental market, including by mom-and-pop owners, which may mark a shift in their expectations. Institutional owners also jumped into the single-family rental market after the bust, but their longer-term presence in the market is unclear.

Understanding the evolving nature and financial motivations of rental property owners is important for designing policies that protect naturally occurring affordable units that may be at risk of either under-investment and deterioration or of upgrading and gentrification. In both cases, these units would be lost from the low-cost stock.

BUILDING AGE AND ACCESSIBILITY
The median age of occupied rental units in 2015 was 42 years—somewhat higher than the median of 37 years for owner-occupied homes. The age gap between owned and rented units has been growing since 1985, when both types of units had an average age of 23 years. This disparity reflects the slowdown in rental construction in the 1990s following the booms of the 1970s and 1980s, as well as significant construction of owner-occupied housing in the early 2000s. In addition, a minor but still sizable share (8 percent) of rental housing was built before 1920. With the recent uptick in multifamily construction since 2015, however, the age gap between owned and rental units may be narrowing.

Today, the oldest units in the occupied rental stock are apartments in multifamily buildings with 2-4 units (median age of 51 years) and detached single-family homes (median age of 49 years). The typical renter-occupied single-family home is 10 years older than the typical owner-occupied home. Meanwhile, apartments in buildings with 20 or more units had a median age of 58 years in 2015, and the typical mobile home rental had the lowest median age of 29 years.

Older rental housing is more likely than newer housing to have quality and safety issues that may jeopardize the health of occupants. Under HUD definitions, 13 percent of occupied rental units built before 1940 have physical inadequacies, compared with 6 percent of units built in 1990 or later. Although overall inadequacy rates for renter-occupied housing are low (9 percent), they are still more than double those for owner-occupied homes (4 percent).

**Structure Type**
- Single-Family Home
- Multifamily with 2-4 Units
- Multifamily with 5-19 Units
- Multifamily with 20 or More Units

**Note**: Single-family homes include detached and attached units, mobile homes, and other units such as RIMs and boats.

Another limitation of older rental units is that they are seldom accessible to households with mobility or other physical challenges. As of 2011, only 3 percent of rental units provided three basic universal design features (extra-wide hallways and doors, bedroom and bathroom on the entry level, and a no-step entrance). Newer and larger buildings, however, tend to offer more of these amenities: one-fifth of apartments in buildings with 50 or more units dating from 1990 or later provided all three features. Given that accessibility needs increase with household age, it is therefore unsurprising that about half of the renters age 75 and over live in larger apartment buildings (Figure 16).

Accessibility features are less common in the single-family and smaller multifamily rental stocks. Just 2.4 percent of renter-occupied detached single-family homes and apartments in buildings with 2–4 units have the three basic universal design features, along with 2.5 percent of attached single-family homes and 1.2 percent of mobile homes. The fact that the majority (52 percent) of renters in the 75-and-over age group live in single-family homes and apartments in small buildings is cause for concern because these rental units are unlikely to provide the accessibility features that would enable tenants to age safely in place.

The availability of rentals with accessibility features varies by region. With its older stock of primarily small properties and multi-story structures, the Northeast has the lowest share of renter-occupied accessible units, with only 2.0 percent offering no-step entry, single-floor living, and extra-wide hallways and doors, followed by the South (3.3 percent), West (3.4 percent), and Midwest (3.6 percent). While no-step entries and single-floor living are more common in the South and West, in no region does the share of units with extra-wide hallways and doors exceed the single digits.

**VARIATION IN RENTS**

The median monthly housing cost (including rent and utilities) for all occupied rental units was $981 in 2016. Location is perhaps the strongest determinant of cost. In the high-priced San Francisco metro area, for example, well over half (62 percent) of occupied units rent for more than $1,500 per month, compared with 17 percent in mid-priced Dallas and just 5 percent in low-cost Cleveland (Online Figure 3). The median rent for a detached single-family home, typically the most expensive type of rental unit, was $2,125 in San Francisco, $1,240 in Dallas, and $920 in Cleveland.

Monthly rents vary widely by structure type, ranging from $890 for apartments in buildings with 2–4 units, to $1,070 for those in buildings with 50 or more units, to $1,087 for single-family homes. Rents also vary with age of the home, with the newest ones (built in 2014 or later) commanding the highest median rents ($1,318) and those built in the 1970s the lowest ($815).
The low-cost stock (renting for under $650 per month, or roughly the bottom quintile for rents) consists of units in a broad mix of structure types (Figure 17). In 2016, the number of occupied low-cost rentals was distributed fairly evenly across structure types, with 1.8 million each in single family homes and buildings with 2-4 units, 1.9 million in buildings with 5-19 units, and 2.1 million in buildings with 20 or more units. Mobile homes account for another 724,000 low-cost units. In contrast, some 71 percent of higher-cost units (renting for at least $1,500 per month, or roughly the top quintile) are attached or detached single-family homes or in buildings with 20 or more units.

Rental apartments in buildings with 2-4 units are the most likely to be affordable, accounting for 22 percent of the lowest-cost stock but just 13 percent of the highest-cost supply. Multifamily buildings with 5-19 apartments are also more likely to have moderate rents, providing 27 percent of units renting for $850-1,099 and only 16 percent of highest-cost rentals.

**Additions to the Rental Stock**

The number of single-family rentals shot up from 14.2 million units in 2001 to 18.2 million units in 2016—a 29 percent increase that far outpaced the 18 percent growth in the overall rental stock. Owner-to-rent conversions drove almost all of this gain, with only 575,000 single-family homes built expressly for the rental market over this period. Indeed, in 2011-2013 alone (the last year for which a constant sample is available), tenure conversions of occupied housing units resulted in a net gain of more than 420,000 single-family rentals.

However, this trend may be moderating. According to the American Community Survey, 2015 was the first year since 2006 when the number of single-family rentals declined, suggesting that there were at least some conversions back to owner occupancy. While turning up again in 2016, growth in the number of single-family rentals nonetheless remained well below average annual levels in the previous decade.

Meanwhile, most new rental construction consists of larger properties. Census construction data show that the share of completed rentals in buildings with 20 or more units grew from 54 percent in 2001 to 83 percent in 2016. As a result, apartments in these larger properties accounted for just over one-fifth of the rental stock (9.9 million units) in 2016, an increase of 37 percent—or more than 2.6 million units—since 2001.

In addition to their concentration in large structures, many recent additions to the rental stock have high rents (Figure 18). The share of newly built units renting for $1,500 or more soared from 15 percent in 2001 to 40 percent in 2016. Over this same period, the share of newly built units renting for less than $850 per month fell from 42 percent of the rental stock to 18 percent.

**Rising Construction Costs**

At least part of the reason for the surge in high-end construction is that developing multifamily housing is increasingly expensive. Between 2012 and 2017, the price of vacant commercial land—a proxy for developable multifamily sites—was up 62 percent. Over this same period, the combined costs of construction labor, materials, and contractor fees rose 25 percent, far faster than the general inflation rate of just 7 percent (Figure 19). Cost increases for key building materials, such as gypsum, concrete, and lumber, have also outpaced inflation in recent years.

Data obtained from RS Means indicate that construction of a three-story, 22,500 square-foot apartment structure with a reinforced concrete frame—including the cost of materials, labor at union wages, and fixed contractor and architectural fees, but excluding land costs—would average $192 per square foot in 2017. The cost of building that same structure in 2016, however, would have been 8 percent lower. Of course, costs vary widely by location. For example, construction costs for this sample building would be 43 percent above the national average in New York City and 17 percent below the national average in Dallas.

Adding to development costs, recent construction of rental housing is largely concentrated in central cities. Between 2013 and 2016,

THE OUTLOOK

Strong demand has sparked the addition of millions of rental units over the past decade. This growth has come from construction of new units, mainly in large apartment buildings, as well as conversion of single-family homes from owner occupancy. However, with the aging of the overall stock and new construction focused primarily on the high end of the market, concerns are mounting that the rental supply will have even less capacity to meet the needs of lower- and middle-income households or the growth in demand for accessible housing as the population ages.

While local policymakers have little sway over the price of construction materials, they do influence the amount of land available for high-density development, the process needed to gain approvals, and the characteristics of housing that is allowed—all of which help determine the amount, type, and cost of the housing that is built. Local governments can therefore promote construction of much-needed rental units (particularly lower-rent units) by expediting approvals; guaranteeing by-right development of small multifamily buildings, particularly those with affordable units; reducing parking and other property requirements; and allowing higher densities for projects that are transit-accessible.

For their part, developers have increasingly adopted cost-saving technologies and switched to lower-cost building materials—for example, using plastics for plumbing and electrical boxes or relying more on prefabrication and modularization, which can significantly reduce waste and construction time. Collectively these efforts would reduce per unit development costs and the rents that households have to pay, ultimately encouraging more construction targeted to lower- and middle-income renters. Investments in energy efficiency would also provide long-term utility savings for tenants and could reduce maintenance costs for owners.

Efforts to preserve the stock of older affordable rentals are also vital. Expanding existing approaches can help. For example, certain states and localities allow the use of housing trust funds for operating and maintenance costs of affordable units, as well as for emergency repairs. The National Housing Trust Fund is also making a limited share of program funds available for these purposes. Real estate tax relief programs can also incent landlords to maintain their affordable units in good repair. Finally, programs that help nonprofits purchase lower-rent, unsubsidized units in exchange for affordability restrictions can help prevent further losses from the affordable supply, particularly in neighborhoods with rising rents.

nearly 60 percent of new unfurnished units were built in the principal cities of metro areas—up 10 percentage points from the period between 2000 and 2012. This trend appears to have continued in early 2017, with the share of rental completions in principal cities nudging above 65 percent.

The supply of developable sites in central locations is extremely limited, which raises land prices and generally entails more extensive permitting, higher legal fees and site preparation costs, and the design of taller, more expensive buildings. According to the Survey of Market Absorption, these costs are reflected in the nearly 15 percent differential in median asking rents for new apartments built in principal cities ($1,600) than in suburbs ($1,390) in 2016.

Regardless of location, though, new multifamily rentals are less affordable to the growing number of households with middle and lower incomes. The real median asking rent for newly completed multifamily units increased 27 percent between 2011 and 2016, to $1,480, while real median renter income increased only 16 percent over the same period. In addition to rising construction costs, this jump in asking rents also reflects increased construction of luxury apartments for higher-income renters.

Efforts to preserve the stock of older affordable rentals are also vital. Expanding existing approaches can help. For example, certain states and localities allow the use of housing trust funds for operating and maintenance costs of affordable units, as well as for emergency repairs. The National Housing Trust Fund is also making a limited share of program funds available for these purposes. Real estate tax relief programs can also incent landlords to maintain their affordable units in good repair. Finally, programs that help nonprofits purchase lower-rent, unsubsidized units in exchange for affordability restrictions can help prevent further losses from the affordable supply, particularly in neighborhoods with rising rents.
While the fundamentals remain strong for investors, there are signs that rental markets are at a turning point. Real rents are still climbing, but at a slower pace now that vacancy rates are ticking up. Returns to rental property investors remain healthy, but the influx of high-end supply has begun to dampen financial performance in many prime urban locations. Meanwhile, conditions in the vastly undersupplied low-cost segment continue to be extremely tight.

RENTAL HOUSING’S ROLE IN THE ECONOMY
Rental housing is an increasingly important contributor to the US economy. According to Bureau of Economic Analysis estimates, households spent $519 billion on rent alone last year, accounting for 2.8 percent of GDP in 2016—up substantially from the 2.2 percent share averaged during the boom years of the 2000s. Indeed, renters’ real aggregate housing expenditures climbed a strong 3.2 percent annually in 2006–2016, and drove 58 percent of the growth in domestic personal housing consumption over the decade.

With the sustained strength of rental demand and sluggish recovery in single-family construction, over a third of housing starts are now intended for the rental market. This is a larger share than in any year since 1974. Before the recent run-up in multifamily construction, rentals accounted for only about one in five new homes started in a single year. Among multifamily properties, the share of starts intended for the rental market was 93 percent in 2016. Among single-family homes, 4.9 percent are now being built as rentals, significantly higher than the 2.2 percent share averaged in the 1980s and 1990s.

Investments in new multifamily housing have also helped to drive the economy. The multifamily share of private domestic investment in new permanent residential structures grew from just 11 percent in 2000 to nearly 20 percent in 2016. The Census Bureau estimates that the value of private multifamily construction put in place (including labor, materials, soft costs, taxes, and profits) exceeded $62 billion in the 12 months ending in August 2017, similar to multifamily activity near the peak of the housing boom. In sharp contrast, the value of new single-family construction remained nearly 50 percent below the 2006 peak.

ROBUST GROWTH IN RENTAL SUPPLY
Unprecedented growth in renter households—totaling nearly 10 million between 2006 and 2016—fueled one of the fastest rental construction recoveries in history. After hitting a low of just 90,000 units in early 2010, the number of rental housing starts peaked at a 408,000 unit annual rate in early 2017. While this represents the highest volume in any four-quarter period since the late 1980s,

recent production of new multifamily units (which make up the lion's share of rental construction) is still slightly below the 420,000 unit annual rate averaged since 1960. Growth in single-family rentals averaged some 390,000 annually from 2006 to 2016, supplementing new construction in meeting the sharp increase in demand.

Although the national recovery has been robust, the pace of growth in multifamily construction varied widely across markets. Over the latest cycle from 2010 to 2016, multifamily starts added 15 percent or more to the multifamily stock in fast-growing metros such as Austin, Charlotte, Nashville, and Raleigh, but as little as 1 percent in slow-growing areas like Cleveland and Providence. The largest increases in multifamily supply occurred mainly in the South and West, where production was still catching up with rapid population growth.

Overall, however, construction activity has begun to moderate (Figure 20). Indeed, multifamily starts are down 9 percent year-to-date through October 2017 on a seasonally adjusted basis. The slowdown was first evident in 2016 when permitting fell in nearly half of the nation’s 50 largest markets. The five markets with the most multifamily permitting in 2013-2015 declined sharply, collectively registering a 35 percent drop in 2016. This total includes declines of more than 50 percent in Houston and New York, as well as more moderate cuts in Dallas, Los Angeles, and Seattle. Permitting in other large markets, like Atlanta and Denver, continued to increase.

Meanwhile, multifamily starts also fell in nearly half of the nation’s 100 largest metros in the 12 months ending August 2017. By comparison, construction activity slowed in less than two-fifths of these markets just a year earlier. Multifamily starts were down across metro areas of all sizes, with the biggest declines reported in the South and Northeast.

Even so, multifamily construction in many locations was still strong by historical standards. In the year ending August 2017, multifamily starts in nearly half of the nation’s 100 largest metro areas exceeded their annual averages in the two decades leading up to the housing peak (1986-2005). In 26 of these areas, multifamily starts were up by more than 50 percent. Moreover, starts in several markets where multifamily construction had not fully recovered by 2017—including Jacksonville, Riverside, and Sacramento—remained on the rise.

EASING MAINLY AT THE HIGH END

With rental demand soaring, the national stock of vacant rental units shrank from nearly 4.5 million in mid-2010 to just 3.2 million in 2016. As a result, the rental vacancy rate fell sharply from 10.8 percent to 6.9 percent in the third quarter of 2016. However, the national vacancy rate rose to 7.2 percent in the third quarter of 2017, suggesting the rental market is at a turning point.

Vacancy rates for professionally managed apartments in multifamily buildings are even lower. RealPage, Inc. reports a vacancy rate of 4.5 percent in the third quarter of 2017, comparable to those at the peak of the housing boom in 2006. Vacancy rates were under 4.0 percent in more than 40 of the 100 markets tracked, and under 3.0 percent in 16 markets.
New High-End Units Have Become Harder to Fill, But Low-Rent Units Remain in High Demand

But there are signs that conditions are loosening. According to the US Census Bureau, the vacancy rate in multifamily buildings with 5 or more units rose 0.9 percentage point in the third quarter from a year earlier, to 8.5 percent, indicating some easing in that segment. RealPage also reports that the apartment vacancy rate rose by a full percentage point in the year ending in the third quarter, with increases in 95 of the 100 metro areas tracked.

Underlying this shift is growing softness at the high end of the market. In the Class A segment where rents average $1,700 per month, the vacancy rate hovered near 6.0 percent in the first three quarters of 2017—up from around 4.5 percent a year earlier. This is the highest vacancy rate reported since 2011, and the highest rate for any property class.

Newly constructed high-end apartment properties became more difficult to fill last year. According to the Survey of Market Absorption, 10 percent of rentals completed in 2015 and priced at more than $2,450 remained vacant after 12 months. In contrast, only 2 percent of units with rents below $1,250 were still unfilled within one year (Figure 21). Apartment absorption rates fell most in the principal cities of metro areas, where most new supply has come online. In contrast, absorption rates were up in suburban and non-metro markets, where fewer new rentals have been added.

Demand for mid-market (Class B) rentals, which rent for $1,180 a month on average, has also begun to ease. The vacancy rate in this segment ticked up by a full percentage point to 4.6 percent in the third quarter of 2017. While the rate remains relatively low, this increase indicates that softness in the high-end market is beginning to affect mid-market conditions. Nearly 90 of the 100 apartment markets tracked by RealPage reported a year-over-year increase in Class B vacancies in the third quarter.

Meanwhile, the vacancy rate in the lowest-cost segment of the professionally managed market (Class C) was down to just 3.3 percent in the second quarter of this year—its lowest reading since 2001—before jumping back up to 4.1 percent in the third quarter. Despite this uptick, Class C vacancy rates were at or below 3.0 percent in nearly half (46) of the 100 metros tracked by RealPage.

With rents for Class C units about a third lower than the market average, tightness in this segment indicates both ongoing demand for modestly priced rentals as well as a persistent shortfall in supply. Broader measures of vacancy rates that include all rentals confirm these conditions. For example, 2016 American Community Survey data show that vacancy rates for less expensive units (with contract rents below the area median) were below those for more expensive units in 42 of the nation’s 50 largest metros. Indeed, 14 large metros reported rates in the lower-cost segment at or below 5.0 percent last year, compared with just 3 metros in 2006. The tightest conditions were in Los Angeles, Portland, San Francisco, and Seattle, where vacancy rates for low-cost rentals were under 3.0 percent.

Tight conditions are also evident in certain rental structure types tracked by the Housing Vacancy Survey. For example, vacancy rates in buildings with 2-4 units—which tend to be older and less expensive—held at 7.0 percent in the third quarter of 2017. Rates for single-family rentals, however, declined to 6.2 percent in response to strong demand and limited inventory.

RENTS STILL UNDER PRESSURE

The CPI index for rent of primary residence, which covers the broadest range of rental property types, was up 3.9 percent in the year ending September 2017. Although only a modest gain from the previous year, this increase is still noteworthy because it marks yet another year when housing costs have risen faster than the prices of non-housing goods (Figure 22). Rent increases were highest in the West (5.5 percent) and South (3.5 percent), held steady in the Midwest (at 2.9 percent), and slowed somewhat in the Northeast (from 2.9 percent to 2.6 percent).

According to RealPage, the year-over-year increase in nominal rents for professionally managed apartments was 2.7 percent in the third quarter of 2017, continuing the slowdown from 4.0 percent a year earlier and 5.6 percent two years earlier. However, trends vary widely across apartment property types. At one extreme, a flood of
Increases in Rents Continue to Outstrip Inflation in Non-Housing Goods

Notes: Data are through 2017:3. RealPage annual rents are for professionally managed apartment properties in Classes A through C.

New construction brought annualized rent gains for recently built units down to just 1.1 percent in the third quarter (below the rate of inflation in non-housing goods). Rent increases for high-rise properties—which have the highest average rent of $1,890 per month—were also modest at only 1.1 percent. Meanwhile, rents for units in low-rise structures rose 3.1 percent, reflecting the strong demand for lower-cost housing.

Rents for single-family homes (including condos) rose steadily for seven years, with growth hitting a high of 4.4 percent in early 2016, before slowing to 2.8 percent in mid-2017. Much of the slowdown was at the high end (units renting for more than 25 percent above median), where rent growth dropped to just 1.9 percent. Meanwhile, though, rents for low-end single-family units (renting for at least 25 percent below median) climbed by a strong 4.4 percent.

The Largest Rent Hikes Have Occurred in Formerly Low-Cost Neighborhoods of Fast-Growing Metros

Annualized Change in Rent, 2012–2017 (Percent)

![Graph showing rent growth by neighborhood tier and population growth by metro area population]

Notes: The top 100 metros are the largest by population as defined by the 2015 American Community Survey, but exclude Las Vegas and Tucson due to data limitations. Annualized growth in rent is from July 2012 to July 2017, and adjusted for inflation using the CPI-U for All items Less Shelter. Rent quintiles are based on rents within each metro in 2012. Neighborhood rent growth is weighted by the share of renters in each ZIP code in each metro. Slow/fast growth metros are in the bottom/top quartile for population growth. Moderate growth metros are in the middle two quartiles for population growth.

Source: JCHS tabulations of the Zillow Rent Index and US Census Bureau, 2015 American Community Survey 5-Year Estimates.
cent. Most of the areas with rapidly rising rents—including Las Vegas, Orlando, Sacramento, and Seattle—are located in the West and South. Other prominent metros in these two regions also had rent gains over the past few years, but these increases have either moderated (Dallas, Riverside, and Sacramento) or slowed considerably (Austin, Nashville, and Portland).

Meanwhile, nominal rent growth in the Midwest and Northeast has remained slow to moderate, with only a handful of markets reporting annual increases above 3.0 percent over the past year (including Cincinnati and Minneapolis). In contrast, several metros in these regions—Bridgeport, Dayton, Des Moines, Pittsburgh, Providence, Syracuse, and Wichita—posted nominal rent growth that lagged behind general inflation.

Within metro areas, rent increases in once low-cost neighborhoods have been especially large. In the 100 metro areas tracked by Zillow, rents in lowest-tier neighborhoods in 2012 were up sharply by mid-2017 in metros with the highest population growth (Figure 23). In Denver and Houston, for example, annual rent increases in the lowest-cost neighborhoods exceeded those in the highest-cost neighborhoods by more than 2 percentage points. In metros where the population was either stable or declining, however, rents grew slowly across all neighborhood types.

**STRONG RENTAL PROPERTY PERFORMANCE**

The rental property market has been among the best-performing sectors of the economy. The National Council of Real Estate Investment Fiduciaries (NCREIF) reports that nominal growth in net operating income (NOI) for investment-grade properties averaged some 7.7 percent annually in the seven years ending in the third quarter of 2017, compared with just 2.8 percent annually on average in 1983–2010. These strong gains reflect high occupancy rates as well as rising rents. With apartment occupancy rates falling and rent growth slowing, however, NOI growth moderated to a 3.8 percent annual rate in the third quarter—still outpacing the national rate of inflation and in line with historical averages.

Solid growth in operating incomes allows property owners to reinvest in their units. According to the National Apartment Association, real improvement spending per unit more than doubled from 2010 to 2016 (Figure 24). Owners of large apartment properties invested $1,480 per unit on average in 2016, or roughly 10 percent of gross potential rents, up from about 8 percent per year on average between 2001 and 2015.

There is also little sign that single-family rentals are returning to the owner-occupied market. According to the latest American Community Survey, growth in the total number of single-family rent-
With Apartment Prices at an All-Time High...

Healthy investor appetite has driven up the real prices of investment-grade apartment properties by 9.3 percent annually over the past seven years. Real Capital Analytics data indicate that apartment prices stood 24 percent above their 2007 peak in mid-2017 (Figure 25). Prices for properties in highly walkable central business districts are particularly high, up 84 percent from their previous peak. Properties in highly walkable suburbs have also appreciated rapidly, exceeding the previous peak by more than 40 percent. Although much slower to recover, rental property prices in more car-dependent suburbs still surpassed previous peaks by 13 percent by mid-2017.

The apartment property market is, however, cooling. Prices declined slightly for the Midwest and Northeast regions over the past year. And while prices in several metros in the West and South (including Atlanta, Los Angeles, Nashville, Phoenix, San Diego, Seattle, and Tampa) continued to climb through mid-year, prices in several others (Charlotte, Houston, Orlando, and San Jose) declined in real terms.

NCREIF estimates show that the total return on investment in the multifamily sector, including net income and appreciation in property values, exceeded 10 percent annually from late 2010 through early 2016. But with price appreciation slowing, ROI ramped down to a still respectable 6.2 percent in mid-2017. Investor appetite nonetheless remains strong, with CBRE reporting historically low capitalization rates for multifamily assets in nearly all markets and tiers in the first half of this year.

MULTIFAMILY SALES VOLUME SOFTENING

According to Real Capital Analytics, the annual volume of large apartment purchases (prices of $2.5 million or more), net of dispositions, hit a record high of $169.6 billion in the third quarter of 2016 in real terms, a 30 percent increase from the previous peak in the second quarter of 2006. By mid-2017, though, deal volume edged down to 148.1 billion, with declines in both international and institutional/equity fund investments. More than half (63 percent) of net acquisitions came through private domestic sources, while 33 percent were through institutional and equity funds. The shares of REITs and foreign investment were small by comparison, in the 5-6 percent range.

With pricing at or near all-time highs and limited inventory on the market, large apartment deals in five of the six major metro areas tracked by RCA—Boston, Los Angeles, New York City, San Francisco,
and Washington, DC—slowed in the first half of 2017 from a year earlier. The exception was Chicago, where net sales continued to pick up. Large purchases of high- and mid-rise apartment buildings also rose in non-major metros.

Investors and lenders alike appear more cautious at this stage of the cycle. According to a recent Federal Reserve survey for the third quarter of 2017, bank loan officers on net reported weakening demand for loans secured by multifamily residential structures, while also reporting more stringent lending standards—the ninth consecutive quarter of tightening.

Nevertheless, the Mortgage Bankers Association reports that the volume of multifamily loans outstanding (including both originations and repayment/write-offs of existing loans) hit a new high of $1.2 trillion in nominal terms in early 2017, a 9 percent increase from a year earlier and a 44 percent jump from early 2011. Federal lending sources were responsible for fully two-thirds of the net increase in debt financing over the past year. Banks and thrifts have also steadily expanded their lending, raising their share of mortgage debt outstanding from a quarter in 2011 to about a third.

Delinquency Tracker, the noncurrent rate for commercial mortgage-backed securities (60 days past due, in foreclosure, or REO), though higher, was still a modest 2.8 percent in August 2017.

THE OUTLOOK

After seven years of tightening, rental market conditions have begun to ease in many metro areas. So far, most of the slack is at the upper end of the market and in core urban areas, where most new rental units have come online. However, supply pressures may be lessening in the moderately priced segment as well.

While this does appear to be a turning point, the extent of any potential slowdown depends in large part on the strength of future rental demand. The most likely scenario is that renters will still account for about a third of household growth going forward, which would make for a soft landing from current market conditions. But if the downshift in renter household growth is more significant, the impact on markets would be more negative.

Whatever the short-term outlook, there will be ongoing need for lower-cost rental housing. Now that the high end is saturated, developers may turn their attention to the middle-market segments. But given the challenges of supplying lower-cost units amid high and rising development costs, government at all levels will have to find new ways to facilitate preservation and expansion of the affordable stock. The housing industry must also play its part in fostering innovation to meet the nation’s rental affordability challenges.
While affordability has improved somewhat, the share of renter households with cost burdens remains well above levels in 2001. Although picking up since 2011, renter incomes still lag far behind the 15-year rise in rents. Renters of all types and in all markets face affordability challenges, although lower-income households are especially hard-pressed to find units they can afford. Indeed, high housing costs have eroded the recent income gains among these households, leaving many renters with even less money to pay for other basic needs.

RENTER INCOMES AND HOUSING COSTS
Despite some recent improvement, the rental housing affordability gap remains wide. Median monthly rental costs were up 15 percent in real terms in 2000–2016, increasing from $850 to a high of $980. At the same time, median renter household income fell sharply between 2000 and 2011, from $38,000 to $32,000, before gradually recovering to $37,300 in 2016. Part of this rebound, however, reflects the growing presence of higher-income households in the rental market rather than income gains alone.

Even so, growth in renter incomes across all income quartiles has outpaced the rise in housing costs since 2011, modestly narrowing the affordability gap. The median monthly income for renters in the bottom quartile increased 10 percent in real terms from $1,000 in 2011 to $1,100 in 2016, while their monthly housing costs rose 3 percent from $740 to $760. By comparison, the median monthly income for renter households in the top quartile grew 9 percent over this period, to $11,300, but their housing costs jumped 6 percent, from $1,600 to $1,700.

With this pickup in income growth, the number of cost-burdened renter households (paying more than 30 percent of income for housing, including utilities) receded from a high of 21.3 million in 2014 to 20.8 million in 2016. The number of severely cost-burdened renters (paying more than 50 percent of income for housing) also edged down from 11.4 million to 11.0 million. The declines in the number of cost-burdened households between 2015 and 2016 coincide with the largest increase in median renter income since 2000.

While down slightly since its 2011 peak, the share of cost-burdened renter households remains high (Figure 26). After increasing from 39 percent in 2000 to 51 percent in 2011, the share of cost-burdened households dipped to 47 percent in 2016. The share of severely cost-burdened renters also fell from 28 percent in 2011 to 25 percent. Again, these small improvements reflect not only a drop in the number of cost-burdened renters but also rapid growth in the number of renters with higher incomes—the group least likely to be cost burdened. In fact, the number of renters earning at least $75,000 rose by 40 percent between 2011 and 2016, to 9.1 million, the fastest growth in renter households in any income group.
Despite Rising Incomes, the Share of Cost-Burdened Renters Remains High

GEOGRAPHY OF COST BURDENS

Despite declines in the majority of states between 2015 and 2016, large shares of renters across the country are housing cost burdened. Indeed, the shares in California, Colorado, Florida, Hawaii, and New York range from 51 percent to 54 percent, although for different reasons. For example, renters in Colorado, Florida, and New York have relatively moderate median incomes but face high housing costs. In contrast, renters in California and Hawaii have high incomes but even higher housing costs, with both rents and incomes ranking in the top five in the country. Alaska is currently the most affordable state, with the cost-burdened share of renters at 37 percent. Although housing costs in Alaska are the sixth highest nationwide, median renter income is the second highest.

Lower housing costs, however, do not mean greater affordability. Although median housing costs in Alabama, Kentucky, Maine, Mississippi, and West Virginia are in the bottom fifth for the nation, the shares of cost-burdened renters in these states are above 41 percent. The states with the smallest shares of cost-burdened renters are located primarily in the Great Plains region—including Montana, North Dakota, South Dakota, and Wyoming—where median housing costs are low and renter populations are small. But even in these states, more than one-third of renters have housing cost burdens.

Cost-burdened renters live in communities of all sizes, but finding affordable housing in larger metro areas is particularly challenging. About half (51 percent) of renter households in the nation’s nine largest metros pay more than 30 percent of income for housing (Figure 27). The median monthly housing cost in these areas is $1,200 while the median renter income is $3,600. Among this group of nine metros, Miami has the highest shares of cost-burdened renters at 61 percent. The shares of cost-burdened renters are slightly lower in large (47 percent), mid-size (47 percent), and small metros (42 percent). Small metros have the lowest median housing costs of any urbanized areas at $720 and the lowest median incomes at $2,400.

From 2011 to 2016, the cost-burdened shares of renters declined in 220 out of the nation’s 275 mid-size and larger metros (80 percent), but primarily because increasing numbers of moderate- and higher-income households had entered the rental market. The number of cost-burdened renters decreased in only 46 percent of these metros over this period.

In 63 of the nation’s 658 small metros (10 percent), more than half of renters were housing cost burdened in 2016. About two-thirds of small metros with majority shares of cost-burdened renters are in the South and West. Meanwhile, the number of cost-burdened renters in 385 small metros (59 percent) fell between 2011 and 2016.
The Share of Middle-Income Renters with Cost Burdens Is Growing Rapidly

Rural areas tend to have lower, but still sizable, shares of cost-burdened renters (40 percent). Even so, more than 46 percent of rural renters in California, Maryland, New Hampshire, and New York are housing cost burdened. These states are largely urbanized, suggesting that high rents in metropolitan areas extend into rural areas. Cost-burdened households in rural areas are often more dispersed than in metro areas, making it difficult to target effective policy interventions.

UNIVERSALITY OF COST BURDENS
Renters in many demographic groups are cost burdened, but low-income households are the most likely to pay a disproportionate share of their incomes for housing. In 2016, 83 percent of renter households with incomes below $15,000 had cost burdens, including 72 percent with severe burdens. Some 77 percent of renters earning between $15,000 and $30,000 were also cost burdened. By comparison, only 6 percent of renters making at least $75,000 were cost burdened in 2016.

Over the past 15 years, more than half of the growth in the number of cost-burdened renters has been among renters earning under $30,000. However, the largest increases in cost-burdened shares have been among moderate-income households. From 2001 to 2016, the number of cost-burdened renters earning $30,000-45,000 rose by 1.3 million, bringing the share for this income group from 37 percent to 50 percent (Figure 28). Similarly, the addition of 1.1 million cost-burdened households with incomes of $45,000-75,000 nearly doubled the share in this group from 12 percent to 23 percent.

Being fully employed is no panacea. In 2016, some 56 percent of renters with jobs in personal care and service occupations were housing cost burdened (Online Figure 5). Indeed, more than half of renters working in food preparation and service, building and grounds maintenance, and healthcare support—industries with many low-wage jobs—had cost burdens. Conversely, less than 20 percent of renters in higher-paying fields such as computer science, mathematics, architecture, engineering, and oil extraction, were housing cost burdened in 2016.

In addition to low income, several household characteristics—including race/ethnicity, age, household composition, and disability status—are associated with cost burdens. For example, 55 percent of black and 54 percent of Hispanic renters were housing cost burdened in 2016, an increase of about 7 percentage points for both groups in 2001-2016. By comparison, 43 percent of white renters and 47 percent of Asian and other minority renters were cost burdened, up 5-6 percent over this period.

In addition, cost burdens are common among households age 65 and over, as well as among those under age 25. As of 2016, 54 percent of older renters had cost burdens, along with 60 percent of younger renters. Many members of these age groups are out of the workforce or have low wages, either because of retirement and/or disability or because they are still students.

Household composition also makes a difference. Married or partnered households with more than one potential earner are less frequently
cost burdened. Those with children present are more frequently burdened, perhaps reflecting the more limited hours that parents are available to work. For these reasons, single parents have the highest cost-burdened share (63 percent) of any household type, well above that for married or partnered parents (39 percent).

Finally, 55 percent of renter households that have a member with a disability have cost burdens, compared with 45 percent of those with no disabilities. Rental cost burdens can be particularly detrimental to households with disabilities in that high housing costs may constrain their ability to pay for medical and other essential needs.

THE LOW-COST HOUSING DEFICIT
The prevalence of cost burdens among lower-income renters is due in part to a shortage of low-cost housing in the private market. To be low cost, housing must be affordable at the 30-percent-of-income standard to very low-income renters (earning up to 50 percent of area median income).

HUD's Worst Case Housing Needs 2017 Report to Congress documents the growing gap between supply of and demand for low-cost rentals. Worst case needs are defined as the number of very low-income renters who are severely cost burdened or living in inadequate housing. After a slight dip from 8.5 million in 2011 to 7.7 million in 2013, the number of renter households with worst case needs increased to 8.3 million in 2015. Nearly all of these cases (98 percent) arise from lower-income households having to pay more than half their incomes for housing costs rather than from problems of housing adequacy.

Some of the pressures on the low-cost supply arise from the fact that households with moderate or even high incomes occupy the units that low-income renters could afford. HUD estimates that 93 units are affordable for every 100 very low-income renters, but of these, only 54 are both available and adequate. For extremely low-income renters, the supply of affordable housing nationally is just 66 units per 100 renters, with only 33 of those units meeting the available and adequate criteria.

HUD adjusts incomes based on household size to determine affordability and eligibility for housing subsidies. Given that the median income of very low-income families nationally was $28,400 in 2015, a very low-income family of four could afford to pay $710 per month for rent. This number, however, is much lower in some counties. Moreover, the median family of four with extremely low income could afford only $430 in monthly housing costs.

Recent data from the Urban Institute confirms the shortage of privately owned affordable rental housing (also known as naturally

Rising Housing Costs Have Eroded Disposable Incomes…
Median Income Left Over After Paying for Housing Costs (Indexed)

![Graph showing median income left over after paying for housing costs indexed over time.]

Rising housing costs have eroded disposable incomes, especially among lowest-income renters. The median income left over after paying for housing costs (in thousands of dollars) has declined significantly, particularly for the lowest-income quartile. The graph illustrates this trend, with a notable dip in 2013, which is discussed further in the text.

Especially Among Lowest-Income Renters
Median Income Left Over After Paying for Housing Costs (Thousands of dollars)

![Graph showing median income left over after paying for housing costs by income quartile.]

The added burden of utility and transportation costs is crucial for lowest-income renters. Utility spending varies across income groups and geographies. Lowest-income renters (making less than $15,000) spend the least on utilities, or $120 per month at the median. Renters in this income group living occurring affordable housing available to extremely low-income renters. In 2014, counties with populations of at least 20,000 had an average of 34 naturally occurring affordable, adequate, and available units per 100 extremely low-income renters. Of these counties, 29 (about 2 percent) had no units meeting the criteria, while the most affordable counties provided 81 units for every 100 extremely low-income renters. On average, smaller counties have a higher ratio of supply to demand than larger urban counties, while large urban counties have the greatest deficit (Figure 29).

At the same time, a Hudson Institute report finds that losses of low-cost units are high. About 60 percent of the 15 million rentals affordable in 1985—some 8.7 million units—were lost by 2013. The biggest reductions were due to permanent removals, with 27 percent of affordable rentals in 1985 (4.1 million units) demolished, destroyed in disasters, or reconfigured into fewer units. About 18 percent (2.7 million units) were converted to owner-occupied or seasonal housing, while 12 percent (1.7 million units) were upgraded to higher rents through gentrification. The remaining 276,000 units were temporarily out of the affordable stock.

This same report also documents how the low-cost rental stock is replenished over time. A little under a third of affordable rentals in 2013 were also affordable in 1985, highlighting the importance of preservation. Even so, a large majority of affordable rentals were added through a variety of other means over time, with roughly equal shares coming from new construction and conversion of non-residential structures, filtering from higher price points, and conversion of owner-occupied or seasonal housing to rentals (Figure 30).

Given the lack of naturally occurring affordable units, federal housing assistance is crucial for lowest-income renters. The Urban Institute estimates that HUD and USDA programs assist 53 percent of units affordable to extremely low-income renters. In the largest counties where supplies of naturally occurring affordable units are especially tight, federal programs on average contribute an average of 24 units per 100 extremely low-income renters. In smaller and non-metropolitan counties, federal programs account for an average of 27 units per 100 extremely low-income renters.

The Added Burden of Utility and Transportation Costs
For renters that pay for their own use, utilities can be a sizable component of total housing outlays. The 2016 American Community Survey reports that the median renter spent $140 per month on electricity, gas, heating fuel, and water bills beyond any utility costs included in the rent.

Utility spending varies across income groups and geographies. Lowest-income renters (making less than $15,000) spend the least on utilities, or $120 per month at the median. Renters in this income group living...
in the East South Central census division, including Alabama, Kentucky, Mississippi, and Tennessee, have the highest median outlays of $155 per month. Renters making $75,000 or more have the highest utility bills, amounting to $150 per month. Highest-income renters in the East South Central area spend the most, or $188 per month.

Although lower-income households spend less than higher-income households on utilities, they must dedicate a larger share of their incomes to these costs. Renters in the lowest income group spend 17 percent of their annual incomes on utilities, and highest-income households spend only 2 percent. While the median share of income devoted to utility costs has fallen across all income groups over the last five years, these costs still contribute significantly to overall housing outlays.

Some renter households make tradeoffs between housing they can afford and location, thus adding to their transportation costs. Indeed, the median household with no housing cost burden spends more on transportation than the median household that is cost burdened. The 2016 Consumer Expenditure Survey reports that transportation costs account for 31 percent of total housing and transportation spending for the median renter. Even excluding vehicle purchases, the median transportation cost represents 21 percent of housing and transportation costs combined.

**CONSEQUENCES OF HIGH HOUSING COSTS**

High housing costs have eroded renter incomes and exacerbated inequality among renter households. After paying for their housing, the amount of money that lowest-income renters had left over for all other expenses fell 18 percent from 2001 to 2016 (Figure 31). Over the same period, the amount of money that highest-income renters had to spend on other costs increased by 7 percent.

In 2016, the median renter household in the bottom income quartile paid 60 percent of its income for housing. For the median renter in this income group, the amount left over for all other needs was less than $500 per month (Figure 32). By comparison, the median renter in the top quartile paid just 14 percent of household income for housing and had nearly $9,700 left over for other expenses.

A recent JCHS working paper assesses the gap between household incomes and outlays for both housing and basic living expenses (including transportation, food, childcare, healthcare, and income taxes) in three metropolitan areas in 2015. Not surprisingly, low-income households faced significant challenges in paying for basic necessities after covering their rents, even if these households were fortunate enough to find housing they could afford. Despite lower living expenses, lowest-income single-person households still faced significant financial challenges in covering housing costs and necessities. The results also show that childcare costs incurred by families leave even moderate-income households with cost burdens.

**THE OUTLOOK**

While the recent drop in the number of housing cost-burdened renters is good news, future meaningful progress is far from certain. Indeed, at the average annual pace of decline from 2014 to 2016, it would take another 15 years just to return to the 2006 level of 17.0 million cost-burdened households and 24 years to hit the 2001 level of 14.8 million households. In effect, the latest economic cycle seems to have defined a new normal for the nation’s rental affordability challenges.

Improvement in rental affordability depends on the trajectories of household incomes and housing costs. The recent growth in renter incomes has come at a time when the economy is nearing full employment, so sustained gains are uncertain. In addition, the Bureau of Labor Statistics expects that the fastest employment growth will be in several low-wage occupations—such as personal care, healthcare support, and food preparation—with large shares of housing cost-burdened workers. For earners in these occupations, full employment will not guarantee access to housing they can afford.

Meanwhile, tight rental market conditions have propelled rapid growth in housing costs relative to incomes, although the recent rise in vacancy rates may help to ease some of the pressure on rents in the short term. Turning back the tide on the nation’s rental affordability challenges thus requires efforts to address lagging incomes among those near the bottom of the economic ladder as well as steps to help reduce the cost of housing. And for those with low incomes, increasing access to rental assistance, expanding the low-cost stock, and preserving affordable housing will be necessary to close the gap between income and housing costs.
The gap between the supply of and demand for rental housing assistance is still growing. Reversing this trend will require increased efforts to preserve assisted units, construct new affordable rentals, and expand the availability of vouchers and other forms of assistance. More immediately, the lack of affordable rentals in high-cost metros may be putting low-income households at greater risk of housing instability, evictions, and homelessness. The need for additional rental housing is especially acute in areas recently devastated by hurricanes and wildfires.

Reduced access to rental assistance
Between 2001 and 2015, the number of very low-income households (making less than 50 percent of area median) was up 29 percent, from 14.9 million to 19.2 million. According to HUD’s Worst Case Needs 2017 Report to Congress, this includes a comparably large increase in the number of extremely low-income households (making less than 30 percent of area median) from 8.7 million to 11.3 million households. At the same time, the number of very low-income households receiving rental assistance rose only 14 percent, from 4.2 million to 4.8 million. As a result, the share of very low-income households that receive rental assistance declined from 28 percent to 25 percent over this period.

The growing gap between need and assistance is evident in the long waiting lists for rental assistance in most cities. In fact, many local housing agencies have closed their waitlists in response to oversubscribed demand, sometimes not accepting new applicants for years. In one extreme example, Los Angeles reopened its waitlist for housing choice vouchers in October 2017 for the first time in 13 years, anticipating as many as 600,000 applications for 20,000 spots on the list.

The shortfall in rental assistance has been accompanied by changes in the stock of federally assisted units. HUD data indicate that the number of public housing units fell from 1.1 million in 2006 to 1.0 million in 2016, while the number of privately owned units with project-based subsidies was down from 1.4 million to 1.3 million. These declines have been offset by an increase in housing choice vouchers, from 2.0 million to 2.3 million. The number of households receiving assistance from the US Department of Agriculture also rose modestly from 263,000 in 2008 to 269,000 in 2016. Although the net change across programs is positive, the increase has not kept pace with growth in the number of very low-income households.

The Low Income Housing Tax Credit (LIHTC) program remains the primary source of support for new affordable rental units. Between 2006 and 2015, the stock of LIHTC units expanded from 1.6 million to 2.3 million. While adding to the overall supply of affordable

Notes: Data include properties with active subsidies as of January 1, 2017. Other includes units funded by HOME Rental Assistance, FHA Insurance, Section 202 Direct Loans, USDA Section 515 Rural Rental Housing Loans, and units in properties with more than one subsidy type expiring on the same day. For properties with multiple subsidies, if one subsidy expires but one or more others remain active, the difference between the number of units assisted by the expiring subsidy and the number of units assisted by the remaining subsidies are counted as expired.

Source: JCHS tabulations of Public and Affordable Housing Research Corporation and National Low Income Housing Coalition, National Housing Preservation Database.
funding flexibility through conversion to project-based Section 8 contracts. After applications for participation in RAD reached the initial limits, Congress raised the cap to 225,000 units for fiscal year 2017. At last count 423 public housing authorities (14 percent) are currently participating in the demonstration.

The impending expiration of affordability restrictions on federally subsidized units presents another preservation challenge. Over the next 10 years, 530,000 rentals with project-based rental assistance, 478,000 units with LIHTC subsidies, and 136,000 units with other types of subsidies will reach the end of their required affordability periods (Figure 34). While some of these properties are owned by nonprofits and other mission-driven organizations, many are privately owned and at risk of converting to market rate. Properties located in areas with high or rising rents are particularly vulnerable to loss from the affordable stock.

Expirations of LIHTC affordability restrictions are set to increase in 2020 as the oldest units built under the program reach the 30-year mark. In response, several states have enacted mandates to extend the affordability periods of LIHTC properties. For example, California now requires 25 years of additional affordability, while New Hampshire, Utah, and Vermont require 69 years. However, these state-level actions do not include funding for maintenance expenditures and were mostly undertaken after 2000, implying that they will only have an impact after 2030. Additional preservation efforts are therefore necessary to keep LIHTC units with expiring affordability restrictions in the subsidized housing stock.

Finally, after a decade of tight rental markets and rising rents, the stock of privately owned low-cost units continues to shrink. These losses are particularly concerning in metros with rapid rent growth, where downward filtering and conversions from the owner-occupied stock have done little to offset the disappearance of low-cost rentals. To combat losses of naturally occurring affordable housing, nonprofit organizations have begun to acquire and manage at-risk properties to keep rents affordable to current and future tenants.

**TRACKING HOMELESSNESS**

In the early 2000s, HUD launched an initiative challenging cities to develop plans to end chronic homelessness within ten years. The 2010 Federal Strategic Plan to Prevent and End Homelessness subsequently broadened this effort, setting goals to end chronic and veteran homelessness within five years and homelessness among families with children and unaccompanied youth within ten years.

Efforts to reduce homelessness appear to be working, at least at the national level. According to HUD's Annual Homelessness Assessment Report (AHAR), the number of people who were homeless on a single night in January fell 15 percent from 647,000 in 2007 to 550,000 in 2016. Nearly all of this decline is due to decreases in the number of unsheltered homeless people, with the number of sheltered homeless people remaining almost constant. The reductions are also largest among the groups most likely to be unsheltered, including the chronically homeless (down 35 percent in 2007–2016) and homeless veterans (down 47 percent in 2010–2016). Less progress has occurred in reducing homelessness among families with children (down 17 percent in 2007–2016).

The point-in-time count, however, provides only a conservative estimate of the number of people and families that experience homelessness over the course of a year. An alternative AHAR measure of the extent of homelessness is that nearly 1.5 million people spent at least one night in a shelter in 2015. Even this figure is low, given that it does not include the unsheltered homeless or at-risk individuals living in doubled-up or other unstable housing situations. The national estimates also mask considerable variation across locations. Metros with the highest rates of homelessness are frequently those with the highest median rents (Figure 35), raising concerns about the consequences of tight conditions in these high-cost markets.

Achieving further reductions in homelessness will require attention to the needs of multiple subpopulations. A recent analysis of HUD's Family Options Study suggests that housing vouchers may be necessary to loss from the affordable stock.

Notes: Included metros are the 71 metropolitan statistical areas (MSAs) among the 25 largest MSAs by total population for which at least 80% of population falls within one or more metro Continuums of Care (CoCs). Metro CoCs are defined here as having at least 80% of their population living within one MSA. Median rent is median gross rent including utilities. Homelessness rate is the point-in-time count of homeless people, both sheltered and unsheltered, divided by the MSA population.

the best strategy for reducing family homelessness. This study was launched in 2008 to test the relative efficacy of several approaches, including priority access to long-term subsidies, temporary subsidies, project-based transitional housing, and usual care through the shelter system and other available supports. According to HUD's evaluation of long-term outcomes, priority access to housing choice vouchers significantly reduced the likelihood of homelessness, doubling up, and shelter stays three years after enrollment in the study.

Less is known about the relative effectiveness of strategies to reduce homelessness among the young. HUD's point-in-time estimates found 36,000 unaccompanied homeless youths in January 2016, while the Homeless Management Information System shows that 137,000 unaccompanied homeless youths used the shelter system at some point in 2015. HUD continues to improve its data collection processes, and 2017 will be the initial year for estimating changes in the number of homeless youth over time.

Findings from the Veterans' Homelessness Prevention Demonstration also highlight the unique physical and mental health needs of homeless veterans. For example, two-thirds of veterans in the demonstration reported experiencing serious depression, anxiety, or tension—including 43 percent with symptoms of post-traumatic stress disorder. The project also revealed the need for service providers to have cultural competency in military norms and the ways in which veterans experience civilian life.

community at large, forced displacements entail direct public costs in the form of fees for court services, social services, and use of homeless shelters and emergency foster care.

The recent focus on forced relocations has led several cities to review their eviction procedures. In 2017, New York City became the first city in the country to guarantee legal representation to low-income residents facing eviction. Other cities have taken steps to limit the set of causes for which landlords can pursue eviction. Expanding support for emergency rental assistance and rapid rehousing programs would also help to protect households most at risk of homelessness.

GROWING INCOME SEGREGATION

Residential segregation by income has increased steadily in recent years, especially among households with the highest and lowest incomes. This trend adds to the challenges posed by entrenched residential segregation by race and ethnicity in many cities. It also raises concerns that low-income renters have increasingly limited access to a full range of neighborhoods.

In 2015, the average renter household earning under $20,000 lived in a neighborhood where 28 percent of residents had comparably low incomes and only 15 percent had incomes above $100,000 (Figure 37). In comparison, the average US household lived in a neighborhood where 18 percent of residents had incomes below $20,000 and 24 percent had incomes above $100,000.

A recent JCHS working paper provides evidence of the detrimental effects of residential segregation on the educational attainment, employment, socioeconomic mobility, and health of low-income renters. Households living in areas of concentrated poverty are particularly vulnerable. Such segregation not only limits economic potential for individuals and society as a whole, but also reduces social cohesion and intergroup trust, increases prejudice, and erodes democratic participation.

Reversing this trend is difficult and would require changes in both private markets and the location of assisted units. A key step would be to increase the supply of low-cost rental units in neighborhoods of all types, including construction of assisted units in a broader range of neighborhoods. Many states have in fact begun to incentivize LIHTC applicants to propose projects that do just that. In addition, the recently finalized Affirmatively Furthering Fair Housing (AFFH) rule establishes a planning process for local HUD grantees to assess current residential patterns and to take meaningful actions that foster inclusion.

Reforms to the housing choice voucher program would also help to increase the supply of low-cost rental units in neighborhoods of all types, including construction of assisted units in a broader range of neighborhoods. Many states have in fact begun to incentivize LIHTC applicants to propose projects that do just that. In addition, the recently finalized Affirmatively Furthering Fair Housing (AFFH) rule establishes a planning process for local HUD grantees to assess current residential patterns and to take meaningful actions that foster inclusion.

Rebuilding After Disasters

The damage wrought by natural disasters in 2017 will pose substantial rebuilding challenges for years to come. Much of the housing stock lost in the recent hurricanes, for example, was renter-occupied. Indeed, the latest American Community Survey indicates that rental units accounted for 41 percent of all housing in the Houston metro area, 36 percent in Florida, and 32 percent in Puerto Rico.
One lesson from prior disasters is that rental housing is restored much more slowly than owner-occupied homes. This is likely due to several factors. While homeowners directly control the rebuilding of their properties, renters must depend on their landlords' decisions. Owners of just a few rental properties may be especially slow to invest in rebuilding if their own homes are also damaged. In addition, policymakers have historically been more generous in assisting homeowners than rental property owners who lack adequate insurance coverage.

According to a 2010 HUD survey, only 60 percent of rental properties that sustained major damage in Hurricanes Katrina and Rita in 2005 had been rebuilt by 2010, compared with 74 percent of homeowner properties with similar levels of damage (Figure 38). Instead, 12 percent of former rental properties were cleared lots and 28 percent contained residential structures with substantial remaining damage, including 13 percent that did not meet the Census criteria for habitability. While there are legitimate concerns about bailing out under-insured rental property investors, a secondary effect of limited rebuilding in these disaster-stricken areas has been to reduce the housing available to renters.

The rebuilding of public housing, project-based units, and units available to voucher recipients presents other challenges. Following Hurricane Katrina, Congress made appropriations for disaster recovery that included supplemental allocations of both low-income housing tax credits and housing choice vouchers. While providing much-needed resources, these allocations require attention to ensure that LIHTC units are completed quickly and that the supply of units available to voucher holders is sufficient. After the 2017 hurricanes, rebuilding of units available to voucher holders may be particularly urgent, given that these rentals account for 62 percent of the HUD-assisted stock in Houston and 64 percent in Tampa.

A recent report from the Community Preservation Corporation documents other lessons from the rebuilding effort following Hurricane Sandy and recommends multiple potential improvements to streamline the application process, speed delivery of rebuilding assistance, and allow federal agencies to better prepare for future events. Given that it is just a matter of time before the next natural disaster occurs, taking these steps in advance will help to protect renter households in the wake of future storms.

THE OUTLOOK

With the economic expansion now in its ninth year, the immediate challenges facing America's rental markets depend on the outlook for the broader economy and the policy decisions of Congress and the Administration. On the one hand, continued economic growth would give a further lift to household incomes, but could also put additional pressure on rents. On the other, though, a recession would put more renters at risk of unemployment and reduced income.

Meanwhile, proposals for tax reform and changes to the LIHTC program make future funding for affordable housing production and preservation uncertain. While its prospects are unclear, a bipartisan bill in the Senate proposes to expand support for the LIHTC program and to change program rules to provide additional flexibility to states and improve the program's ability to serve extremely low-income households. In contrast, the tax reform proposals under consideration could substantially reduce production of LIHTC units by eliminating the important 4 percent credit.

Regardless of the short-term outlook, however, the growing gap between the number of income-eligible households and the availability of rental assistance is a long-term challenge. In some markets, demand-side subsidies—such as expanded access to housing choice vouchers—may be an effective response. However, in many metros across the country, increases in supply have not kept pace with population growth, putting even greater pressure on lowest-income households. In these markets, responding to rapid population growth requires both expansion of the overall rental supply and additional support for new construction and preservation of assisted units.

While the federal government remains the primary source of rental assistance, states and localities must continue to take steps to provide increased support for affordable housing through bond issues, trust funds, inclusionary zoning, and other approaches. Since states and localities also define the regulatory context for market-rate housing, they must also lead efforts to ensure that additions to the rental housing stock keep pace with population growth and to mitigate losses of low-cost units in the private market.

Notes: Data include vacant units that are for rent and rented but not yet occupied. Metro area status classifications include only occupied rental units due to data constraints. Source: JCHS tabulations of US Census Bureau, 2016 American Community Survey 1-Year Estimates.
America's Rental Housing 2017 was prepared by the Harvard Joint Center for Housing Studies. The Center advances understanding of housing issues and informs policy. Through its research, education, and public outreach programs, the Center helps leaders in government, business, and the civic sectors make decisions that effectively address the needs of cities and communities. Through graduate and executive courses, as well as fellowships and internship opportunities, the Joint Center also trains and inspires the next generation of housing leaders.
