2.0 PRUDENCE

All persons authorized to make investment decisions for the City of El Cerrito are trustees and therefore fiduciaries subject to the prudent person rule.

The standard of prudence to be used by City of El Cerrito fiduciaries is the “Prudent Investor” Standard found in the California Government Code Section 53600.3.

The fiduciaries are the City Manager, City Treasurer and City Council. 3.0 OBJECTIVE

The objective of the investment portfolio is to meet the City’s short and long-term cash flow needs. To achieve this objective, the portfolio will be structured to provide, in priority order, safety of principal, liquidity and yield.

3.1 Safety: Safety of principal is the foremost objective of the City of El Cerrito in the investment of public funds. All investments of the City shall be undertaken in a manner that ensures the preservation of capital. Each investment transaction shall seek to ensure that capital losses are avoided, whether from issuer default, broker/dealer default, or erosion of market value. The City shall seek to preserve principal by mitigating the two types of risk: credit risk and market risk.

3.2 Credit Risk: Credit risk is the risk of loss due to failure of the issuer to repay an obligation and shall be mitigated by investing in only high-quality credit investments and by diversifying the investment portfolio so that the failure of any one issuer would not unduly jeopardize the City’s fiscal status.

3.3 Market Risk: Market risk is the risk of market value fluctuations due to overall changes in the general level of interest rates and shall be mitigated by structuring the portfolio so that securities mature at the same time major expenditures occur, eliminating the need to sell securities prior to their maturity. The taking of short positions, which is, selling securities the City does not own, is prohibited. It is explicitly recognized herein, however, that in a diversified portfolio, occasional measured losses are inevitable and must be considered within the context of overall investment return.
3.4 Liquidity: The City’s investment portfolio will be structured to provide sufficient liquidity to meet the operating requirements of the City of El Cerrito. The City of El Cerrito will attempt to match its investments with anticipated cash flow requirements whenever possible. The maximum maturity of any one security, unless otherwise restricted by the California Government Code, is limited to five years. The portfolio’s weighted average maturity shall be limited to three years.

3.5 Yield: State law requires that the objective of return on investment be subordinate to the objectives of safety and liquidity. Employees should also seek the best return on investments while satisfying the concerns of safety and liquidity. Therefore, the Treasurer shall seek to achieve a return on the funds under City control throughout all economic cycles, taking into consideration the City of El Cerrito’s investment risk constraints and cash flow requirements.

3.6 Responsible Investing: The City of El Cerrito recognizes that it has a shared responsibility to protect the lives and livelihoods of its inhabitants from the catastrophic threat and societal costs of climate change. The City believes that its financial investments should support a future where all its residents can live healthy lives without the negative environmental, economic and/or health impacts of global warming.

- Investments are encouraged in entities that are involved in the production of renewable, sustainable energy and have demonstrated a commitment to transparent, accountable corporate governance.

- No direct investments are to be made in publicly-traded companies or private entities that engage in the direct exploration, drilling, production, refining, or marketing of fossil fuels.

- All investments in the State of California’s Local Agency Investment Fund ("LAIF") are exempt from section 3.6.
